#### PREFACE

Poojya Doddappa Appa College of Engineering, Kalaburagi was established in the year 1958 by Hyderabad Karnataka Education society (HKES), founded by Late Shri Mahadevappa Rampure. The KHE Society runs 48 education institutions.

The College campus is spread over 71 acres of land. The college was started with 50% central assistance and 50% state assistance. The initial intake was 120 with degree offered in three branches of engineering viz, Civil, Mechanical and Electrical Engineering. Now it houses 13 undergraduate courses, 10 post Graduate courses and 13 Research centers. All the courses are affiliated to Visvesvaraya Technological University, Belagavi. At present the total intake at UG level is 980 and at PG level is 193. There are 237 teachers in the College out of which 60 are getting salary from the State Government and rest of them are paid by the College management.

The college receives grant in aid funds from the state government. The National Board of Accreditation, New Delhi, accredited the College in the year 2005 for 09 UG courses out of which 08 courses were accredited for three years and 01 Course for 5 years. Six UG courses were accredited in the year 2009 for 03 years. Now the college has been accredited by NBA for 5 programs the accreditation is valid up to June 2022. Further 5 other program have applied and waiting for inspection by NBA.

The college is one among the 14 colleges selected under TEQIP, sponsored by World Bank. It has received a grant of Rs 10.45 Crores under this scheme for its development. The institution is selected for TEQIP phase II in year 2011 for four years. Institution received a grant of Rs 12.50 Crores under TEQIP phase-II scheme for its development. Further the college is selected for TEQIP phase III scheme and received a grant of Rs. 7 Crores under TEQIP Phase-III.

The College was granted autonomous status by the UGC for six years from 2009-10 to 2014-15. Granted the extension for 2014-15 to 2016-17 and further received the extension for 2017-18 to 2018-19.

#### Vision of the Institution

To be an institute of excellence in technical education and research to serve the needs of the industry and society at local and global levels.

#### **Mission of the Institution**

- To provide a high-quality educational experience for students with values and ethics that enables them to become leaders in their chosen professions.
- To explore, create and develop innovations in engineering and science through research and development activities.
- To provide beneficial service to national and multinational industries and communities through educational, technical and professional activities.

## CALCULUS AND LINEAR ALGEBRA

(Common to all branches) [As per Choice Based Credit System (CBCS) scheme] (From the academic year 2021-22)

Course Code	21MA11	CIE Marks	50	
Credits	03	SEE Marks	50	I
Contact Hours/Week (L-T-P)	3-0-0	Total Marks	100	I
Contact Hours	42	Exam Hours	03	I

**Course Learning Objectives**: This course (**21MA11**) will enable students to master the basic tools of differential & integral calculus, differential equations and elementary linear algebra and become skilled for solving problems in science and engineering.

become skined for solving problems in science and engineering.	
MODULE-I	
Differential Calculus-1	8 Hours
Polar curves - angle between the radius vector and tangent, angle between two curves,	
pedal equation. Curvature and radius of curvature in Cartesian and polar forms and	
simple examples. Taylor's and Maclaurin's series expansions for one variable (statements	
only)and examples. Evaluation of Indeterminate forms.	
MODULE-II	
Differential Calculus-2:-	9 Hours
Partial differentiation; Definition and simple problems, Euler's theorem (without proof) and	
examples, Total derivatives, differentiation of composite functions. Jacobians-Simple	
problems. Taylor's theorem for function of two variables (statement only) and simple	
examples. Maxima and minima for a function of two variables with illustrative examples	
MODULE-III	8
Integral Calculus-I	Hour
Reduction formulae for the integration of $\sin^n x$ , $\cos^n x$ , $\tan^n x$ and $\sin^m x \cos^n x$	s
evaluation of these with standard limits- illustrative problems	~
Tracing of curves: Cartesian, Parametric and Polar form. Evaluation of arc length,	
Surface area and Volume.	
MODULE-IV	
Integral Calculus-II	9 Hours
Multiple integrals: Evaluation of double and triple integrals. Evaluation of double	
integrals by change of order of integration and changing into polar co-ordinates.	
Applications to find area by double integration and volume by double and triple	
integration Beta and Gamma functions: definitions, Relation between beta and gamma	
functions and simple problems	
MODULE-V	
Elementary Linear Algebra:	8 Hours
Rank of a matrix-echelon form. Solution of system of linear equations – consistency.	
Gauss-elimination method, Gauss –Jordan method. Definition of Eigen values and Eigen	
vectors and simple examples Infinite Series: Convergence and divergence of infinite series-	
<b>P-series test Comparison test</b> , D'Alembert'sratio test, Cauchy's root test (without	
proof)- Illustrative examples.

#### **Pedagogy (General Instructions):**

These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

- 1. In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons shall develop student's theoretical and applied mathematical skills.
- 2. State the need for Mathematics with Engineering Studies and Provide real-life examples
- 3. Support and guide the students for self–study.
- 4. You will also be responsible for assigning homework, grading assignments and quizzes, and documenting students' progress.
- 5. Encourage the students for group learning to improve their creative and analytical skills.
- 6. Show short related video lectures in the following ways: As an introduction to new topics (pre-lecture activity).
  - As a revision of topics (post-lecture activity).
  - As additional examples (post-lecture activity).
  - As an additional material of challenging topics (pre-and post-lecture activity).

• As a model solution of some exercises (post-lecture activity).

Course Code	CO #	<b>Course Outcome (CO):</b> At the end of the course student will be able to:
	CO1	Apply the knowledge of calculus to solve problems related to polar curves and its applications and expand functions using Taylor's and Mechaurin's series.
21MA11	CO2	Apply the partial differentiation to calculate rate of change of multivariate functions and solve the problems related to composite functions and Jacobeans
	CO3	Apply reduction formulae and solve the problem related to arc length, surface area and volume generated by revolving the curve

#### **Course Learning Objectives**:

- 1. Depreciate the learning of phenomenon of electrical polarization and dielectrics Prescribe the effect of external electrical field on dielectric materials.
- 2. Develop the implications of Quantum theory on the classical free electron theory and introduces the concept of Fermi energy through the Fermi Dirac statistics.
- 3. Superconductors and its applications through different effects.
- 4. Annalyse the basic account of the functioning of laser systems with applications.
- 5. Explain the propagations of light through the optical fibre and the applications of optical fibres.
- 6. To familiarize students with the concepts of elasticity and recognize the elastic properties of materials for engg. Applications.

MODULE-I	
Applied Optics:	9 Hours
Basic principles of lasers, Requisites of laser system. Condition for laser action. Boltzmann	
factor. Numerical. Construction and working of Nd-YAG and semiconductor lasers.	
Application of lasers: LIDAR, Industrial, Medical, and Holography: Principle of recording and	
reconstruction of images.	
Optical fibers; propagation mechanism. Acceptance angle, numerical aperture. Condition for	
propagation. Fractional index change, relation between NA and fractional index change, V-	
number. Types of optical fibers. Attenuation Co-efficient, Application of fiber optics:	
Endoscopy, Temperature sensor. Numericals	
MODULE-II	
<u>Crystallography</u>	8 Hours
Space lattice, lattice parameters, unit cell. Crystal systems, sketch of Bravias lattice. Miller	8 Hours
	8 Hours
Space lattice, lattice parameters, unit cell. Crystal systems, sketch of Bravias lattice. Miller	8 Hours
Space lattice, lattice parameters, unit cell. Crystal systems, sketch of Bravias lattice. Miller indices - procedure for finding miller indices. Planes in cubic unit cell. Expression for	8 Hours
Space lattice, lattice parameters, unit cell. Crystal systems, sketch of Bravias lattice. Miller indices - procedure for finding miller indices. Planes in cubic unit cell. Expression for interplanar distance. Packing factor for SC, BCC and FCC. Crystal structure of NaCl.	8 Hours
Space lattice, lattice parameters, unit cell. Crystal systems, sketch of Bravias lattice. Miller indices - procedure for finding miller indices. Planes in cubic unit cell. Expression for interplanar distance. Packing factor for SC, BCC and FCC. Crystal structure of NaCl. Numerical. Bragg"s law, Braggs X-ray diffractometer and application for determination of	8 Hours

Course Code	21EE14/24	CIE Marks	50
Credits	03	SEE Marks	50
Contact Hours/Week (L-T-P)	3-0-0	Total Marks	100
Contact Hours	42	Exam Hours	03

Prerequisite: Students should have the knowledge of

1. Ohms Law, Kirchhoff's Current and Voltage Law.

- 2. Fundamentals of AC and DC Circuits.
- 3. Basics of Magnetism.

#### Course Learning Objectives: .

- 1. Understanding the concept and analysis of Single phase and Three phase AC circuits.
- 2. Study of construction and performance analysis of single phase transformer.
- 3. Study of construction and working principle of DC machines
- 4. Study of construction and working principle of Three phase AC Machines.
- 5. Study of Power Generation stations, Tariff, measuring instruments and electric safety measures.

MODULE-I	suics.
AC Circuits:	9 Hours
Single Phase Circuits: AC terminologies, Analysis of R,L,C,R-LSeries circuits,	
Disadvantages of low power factor, Measurement of power by VAW method.	
ThreePhase Circuits: Advantages, types of connections, Relation between phase & line values. 3 -	
phase power measurement by two-wattmeter method for balanced load.	
MODULE-II	
Electromagnetism and Single Phase Transformer:	9 Hours
<b>Electromagnetism:</b> Faraday Laws of Electromagnetic Induction, Fleming's rules, Lenz's law, types of EMF and numerical.	
<b>Transformer:</b> Principle, construction and working of single phase transformer, types	
(based on construction), EMF equation, losses, efficiency and Voltage regulation.	
(Numerical related to EMF equation and Efficiency)	
MODULE-III	8 Hours
DC Machines:	
DC generator: Principle, Construction, working, types and EMF equation. (Numerical on	
EMF equation)	
DC Motor:Principle, Working, back emf and its significance, torque equation, necessity of starter,	
3-point starter. (Numerical on Torque & Voltage Equations)	
MODULE-IV	8 Hours
Three Phase AC Machines:	
Alternator: Principle of operation, types and constructional features, EMF equation of	
alternator.(Excluding the winding factors derivation) Numerical on EMF equation.	
Three phase Induction Motor: Construction, concept of rotating magnetic field,	
principleof operation, Star – Delta starter.(Numerical on Slip calculations only).	
MODULE-V	

Generation of	Generation, Tariff, Measuring Instruments and Electric Safety:7 HoursGeneration of Power: Block schematic representation of hydroelectric, thermal, nuclear and solar power generating stations (Self study component).7								
Tariff: Object	ives of Ta	riff, Desirable characteristics of Tariff, Three-part tariff.							
0		ts: Principle, Construction & working of Dynamometer type e energy meter.							
Fuse & MCB.	•	ity of earthing, plate & pipe earthing, Elementary discussion on medies & Precautions(Self study component).							
Question paperstudent has to	e <b>r pattern</b> answer fiv	: Total ten questions will be asked, two from each module. The re questions, selecting at least one from each module.							
	vari," Basi	c Electrical Engineering", New age Publications, 2nd edition, 2011.							
		"Fundamentals of Electrical Engineering", PHI 3rd edition, 2014.							
3. B L Th	eraja& A	K Theraja" Electrical Technology", Vol 1, 2nd edition.							
4. B L Th	eraja& A	K Theraja" ABC of Electrical Engineering", 2nd edition.							
5. D.P. K	othari and	Nagrath "Theory and Problems in electrical Engineering", PHI editi	on 2011.						
6. V. N. N	Aittal and	Arvind Mittal;, "Basic Electrical Engineering" McGraw Hill.							
		lurthy "Basic Electrical Engineering" Sanguine Technical Publisher2	2004.E-						
Course Outcon	nes: On con	mpletion of this course, students are able to:							
Course Code	CO #	<b>Course Outcome (CO):</b> At the end of the course student will be	able to:						
	CO1	State, illustrate electric circuits and solving the Networks							
	CO2 State, illustrate magnetic circuit, solving the networks and identify the parts, explain the construction, working and examine the performance of Transformer.								
21EE14/24	CO3	Identify the parts, explain the construction, working and examine performance of DC Machines.							
	CO4	Recognize the parts, give the illustration of construction and construction of AC machines.	ompute the						
	CO5	Outline the Power Generating stations, analyze the tariff, syn safety measures and explain the working of measuring instruments							

## **Computer Aided Engineering Drawing**

(Common to all branches) [As per Choice Based Credit System (CBCS) scheme]

(From the academic year 2021-22)

Course Code	21ME15/25	CIE Marks	50
Credits	03	SEE Marks	50
Contact Hours/Week (L-T-P)	2-0-2	Total Marks	100
Contact Hours	28 (THEORY) + 28 (PRACTICAL)	Exam Hours	03

#### **Course Learning Objectives:**

1. To understand the fundamentals of orthographic projections of different object in first angle projections method, using BIS standard specifications.

- 2. To prove that Drawing is the best communication tool.
- 3. To improve the imaginary skills and logical thinking capabilities.
- 4. To visualize three dimensions of simple machine components, by drawing Isometric projections.
- 5. To understand section points, section planes, frustums, truncated solids and to mark their Development.
- 6.To understand the solid edge software and the connected tool used to mark 2D drawings on a System.
- 7. To have the basic exposure to solid modeling using 3D solid edge software package.

MODULE-I	
Introduction to CAD Software:	2 Hours
Learning the drawing commands such as point, line, arc, circle, ellipse, rectangle, polygons etc.	Practical
Modify commands such as copy, move, mirror, rotate, pattern, scale etc. Dimensions - linear,	
aligned, radial, angular etc.	
MODULE-II	
Orthographic projections:	8 Hours
Projections of points in all the four quadrants, Projections of straight lines (located in First	Theory+
quadrant/first angle only), True and apparent lengths, True and apparent inclinations to	6 Hours
reference planes (No application problems and midpoint problems).	Practical
<b>Projections of Plane Surfaces (First Angle Projection Only) :</b>	
Projection of Planes such as triangle, square, rectangle, pentagon, hexagon and circle in	
simple positions inclined to both the planes; planes in different positions by change of	
position method only. (No problems on punched plates and composite plates).	
MODULE-III	8 Hours
Projections of Solids : (First angle Projection only)	Theory+
Projection of Solids such as cube, prism, pyramid, cylinder and cone (No problems on tetrahedron	8 Hours
,octahedrons, and freely suspended solids). selection criteria area.(No numericals).	Practica
MODULE-IV	
Development of Lateral Surfaces of Solids:	6 Hours
Introduction, introduction to section planes and sectional views, Development of lateral	Theory+
surfaces of right regular prisms, cylinders, pyramids, cones and their frustums resting with	6 Hours
base on HP only. (No problems on lateral surfaces of trays, tetrahedrons, spheres and	Practical
transition pieces).	

<b>MODULE-V</b> <b>Isometric Projection :</b> (Using Isometric Scale Only) Introduction, Isometric scale, Isometric projection of simple plane figures, Isometric projection of hexahedron(cube), right regular prisms, pyramids, cylinders, cones, spheres. Isometric view of combination of two simple solids.	6 Hours Theory+ 6 Hours Practical
<b>Text Books:</b> 1) Engineering Drawing - N.D. Bhatt & V.M. Panchal, 48th edition, 2005-Charotar Publishing House, Gujarat. 2) A Primer on Computer Aided Engineering Drawing-2006, Published by VTU, Belgaum	

#### **Reference books**:

- 2. Engineering Graphics K.R.Gopalakrishna, 32nd edition, 2005- Subash Publishers Bangalore.**E-Books and Online resources:**

#### NPTEL/SWAYAM/MOOCS:

The topic or concept-wise pedagogy (Teaching Methodology) of the curriculum shall be specified in the content.

#### Question paper pattern:

1. Module -1 is only for practice and not for examination.

- 2. The answer sheets will have to be jointly evaluated by the Internal & External examiners.
- 3. A maximum of THREE questions will be set as per the following pattern (No mixing of questions from different Modules).

4. Examination can be conducted in parallel batches, if necessary.

Q No	From Chapters	Marks Alloted (SEE)
1	Module 2 ( Choice between Points+St lines or Planes)	15
2	Module 3	20
3	Module 4 or Module 5	15
	Total	50

Course Code	CO #	<b>Course Outcome (CO):</b> At the end of the course student will be able to:
	CO1	Produce computer generated drawings using CAD software.
21ME15/25	CO2	Apply the knowledge of orthographic projections (Points, St lines and planes).
	CO3	Students will be able to visualize and draw projections of solids.
	CO4	Students will be able to visualize and draw development of Lateral Surfaces of
	CO5	Create isometric drawings of simple objects reading the orthographic project objects 3D drawings.

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

## **BASIC ELECTRONICS**

(Common to all branches) [As per Choice Based Credit System (CBCS) scheme] (From the academic year 2021-22)

Course Code	21EC17/27	CIE Marks	50	
Credits	03	SEE Marks	50	
Contact Hours/Week (L-T-P)	4-0-0	Total Marks	100	
Contact Hours	42	Exam Hours	03	

**Course objectives:** This course will enable students to:

- Study fundamentals of semiconductors devices like diode, transistors and Operational Amplifier.
- Study basics of communication systems and different modulation types.
- Study Fundamentals of digital electronics.
- Study different transducers and using a CRO for the measurement of signal parameters.
- Build mathematical and numerical background for the design of electronic circuits
- Equipped with the knowledge provided in this course can design and develop electronic circuits

MODULE-IPHoursSemiconductor Devices and applications: P-N Junction diode and characteristics, Rectifiers:Halfwave rectifie,fullwave rectifier,capacitor filter,Zener diode characteristics,zener voltage regulator. Bipolar Junction Transistor:Transistor biasing and it's needs,transistor currents,configurations,CE characteristics,common emitter amplifier.9HoursMODULE-IIField effect transistors and applications:JFET,characteristics,DC biasing of JFET ,DC load line analysis,JFET on an IC chip,advantage of FETs. MOSFET:De type mosfet, enhancement mosfet, characteristics of De type mosfet FET as a switch, FET amplifier and oscillators.9 HoursMODULE-IIMODULE-IIBasics of Communication Systems:Introduction, radio frequency spectrum,need for modulation,radio broadcasting,modulation:amplitude modulation,power relations in AM wave, frequency modulation, superheterodyne AM receiver. Op-Amp Applications: Op-Amp basics, practical op-amp circuit (Inverting , Non Inverting, summer , integrator and Differentiator.)8 HoursMODULE-IV Digital Electronics: Number system, Number base conversions, Signed arithmetic: Binary addition &subtraction, Boolean algebra ,simplification of Boolean expressions, Realization of Boolean expressions using logic gates.8 HoursMODULE-V Electronic System: Block diagram of instrumentation system, Transducer: Strain Gauge, LVDT, Oscilloscope (CRO), CRO based measurements, Displays, Signal Generator case study: remote control and PA Systems. Textbook:8 Hours	Circuits	
P-N Junction diode and characteristics, Rectifiers:Halfwave rectifie,fullwave rectifier,capacitor filter,Zener diode characteristics,zener voltage regulator.       Bipolar Junction Transistor:Transistor biasing and it's needs,transistor currents,configurations,CE characteristics,common emitter amplifier.       Bipolar Junction Transistor:Transistor biasing and it's needs,transistor currents,configurations,CE characteristics,common emitter amplifier.       9 Hours         Field effect transistors and applications:JFET,characteristics,DC biasing of JFET,DC load line analysis,JFET on an IC chip,advantage of FETs.       9 Hours         MOSFET:De type mosfet, enhancement mosfet, characteristics of De type mosfet FET as a switch, FET amplifier and oscillators.       8 Hours         Basics of Communication Systems:Introduction, radio frequency spectrum,need for modulation,radio broadcasting,modulation:amplitude modulation,power relations in AM wave,frequency modulation, superheterodyne AM receiver.       8 Hours         Op-Amp Applications: Op-Amp basics, practical op-amp circuit (Inverting , Non Inverting, summer , integrator and Differentiator.)       8 Hours         MODULE-IV       Digital Electronics: Number system, Number base conversions, Signed arithmetic: Binary addition & subtraction using 2's complement, Logics gates, Half Adder/Subtractor, Full Adder/Subtractor, Boolean algebra ,simplification of Boolean expressions, Realization of Boolean expressions using logic gates.       8 Hours         MODULE-V       Electronic System: Block diagram of instrumentation system, Transducer: Strain Gauge, LVDT, Oscilloscope (CRO), CRO based measurements, Displays, Signal Generator case study: remote control and PA Systems.	MODULE-I	
P-N Junction diode and characteristics, Rectifiers:Halfwave rectifie,fullwave rectifier,capacitor filter,Zener diode characteristics,zener voltage regulator.       Bipolar Junction Transistor:Transistor biasing and it's needs,transistor currents,configurations,CE characteristics,common emitter amplifier.       9 Hours         MODULE-II         Field effect transistors and applications:JFET, characteristics,DC biasing of JFET, DC load line analysis,JFET on an IC chip,advantage of FETs.       9 Hours         MODULE-II         Basics of Communication Systems:Introduction, radio frequency spectrum,need for modulation,radio broadcasting,modulation:amplitude modulation,power relations in AM wave,frequency modulation, superheterodyne AM receiver.       8 Hours         Op-Amp Applications: Op-Amp basics, practical op-amp circuit (Inverting , Non Inverting, summer , integrator and Differentiator.)         MODULE-IV         Digital Electronics: Number system, Number base conversions, Signed arithmetic: Binary addition & subtraction using 2's complement, Logics gates, Half Adder/Subtractor, Boolean expressions using logic gates.         MODULE-V         Electronic System: Block diagram of instrumentation system, Transducer: Strain Gauge, LVDT, Oscilloscope (CRO), CRO based measurements, Displays, Signal Generator case study: remote control and PA Systems.	Semiconductor Devices and applications:	9Hours
rectifier,capacitor filter,Zener diode characteristics,zener voltage regulator. Bipolar Junction Transistor:Transistor biasing and it's needs,transistor currents,configurations,CE characteristics,common emitter amplifier. MODULE-II Field effect transistors and applications:JFET,characteristics,DC biasing of JFET ,DC load line analysis,JFET on an IC chip,advantage of FETs. MOSFET:De type mosfet, enhancement mosfet, characteristics of De type mosfet FET as a switch, FET amplifier and oscillators. MODULE-III Basics of Communication Systems:Introduction, radio frequency spectrum,need for modulation,radio broadcasting,modulation:amplitude modulation,power relations in AM wave,frequency modulation,superheterodyne AM receiver. Op-Amp Applications: Op-Amp basics, practical op-amp circuit (Inverting , Non Inverting, summer , integrator and Differentiator.) MODULE-IV Digital Electronics: Number system, Number base conversions, Signed arithmetic: Binary addition & subtraction using 2's complement, Logics gates, Half Adder/Subtractor, Full Adder/Subtractor, Boolean algebra ,simplification of Boolean expressions, Realization of Boolean expressions using logic gates. 		.1
1. Basic Electronics by B. L. Theraja, S. Chand Publications		

\_\_\_\_\_

- 2. Electronic devices and circuit theory by R L Boylestad, Louis N, 6TH edition, PHI. **Reference Books:**
- 1. Digital logic and computer design by M Morris Mano.
- 2. Electronics devices & circuits by David Bell, 5<sup>th</sup> Edition, Oxford University Press.
- 3. Electronic Devices by Thomas L. Floyd, 8th Edition, Pearson Education, Inc., 2007

### **Question paper pattern:**

- The question paper will have ten questions.
- Each full question consists of 20marks.
- There will be 2 full questions (with a maximum of four sub questions) from each module.
- Each full question will have sub questions covering all the topics under a module.
- The students will have to answer 5 full questions, selecting one full question from each module.

Course Code	CO	<b>Course Outcome (CO):</b> At the end of the course student will be able to:
	CO1	Understand the basics of semiconductor devices and their applications.
	CO2	Analyze biasing technique of JFET and MOSFET and their applications as a sumplifier and oscillator.
21MA11	CO3	Understand different modulation techniques and working of receiver circuit. A working of Op amp And it's Applications.
	CO4	To study number base conversion, understand laws of Boolean algebra, workin different logic gates.
	CO5	Understand the working of different transducers and use a CRO as a measurin instrument.

#### : Engineering Physics Laboratory (Common to all branches) [As per Choice Based Credit System (CBCS) scheme]

(From the academic year 2021-22)

Course Code	21PHL11/21	CIE Marks	50
Credits	01	SEE Marks	50
Contact Hours/Week (L-T-P)	0-0-2	Total Marks	100
Contact Hours	28	Exam Hours	03

#### **Course Objectives:**

- 1. Characteristics of diode and conductivity of semiconductor
- 2. Information of impedance, identfy passive components and transfer of resistance in electronic circuits.
- 3. Fundamental properties of light and emission of radiation with temperature along with the behavior of light in the phenomena of interference and diffraction.
- 4. Information of temperature dependance of resitivity.
- 5. Elastic proprties a material and Apprehend the concepts of interference of light, diffraction of light and Fermi energy
- 6. Understand the principles of operations of semiconductor devices such as semiconductor diode, and NPN transistor using simple circuits
- 7. Determine elastic moduli and moment of inertia of given materials with the help of suggested procedures
- 8. Recognize the resonance concept and its practical applications Understand the importance of measurement procedure, honest recording and representing the data, reproduction of final results

List of Experiments	Module
1. Y-by single Cantilever Method	Module 3
2. Co-efficiency of Viscosity by Stoke's method	Module 3
3. Sonometer (Frequency of Ac)	Module 4
4. Determination of Fermi Energy	Module 5
5. Newton's Rings	Module 1
6. Interference of Air wedge	Module 1
7. Diffraction grating by minimum deviation method	Module 1
8. Band Gap of Semiconductor	Module 1 and
9. Transistor Characteristics	Module 5
10. I-V Characteristics of Zener Diode.	General physics
11. Determination of Dielectric Constant using RC circuit.	General physics
12. Frequency response of series and parallel LCR circuit and study of	Module 4
quality factor.	General physics
13. Verification of Stefan's law.	General physics
14. Torsional pendulum	Module 3
15. Fly wheel	Module 3

## DIFFERENTIAL EQUATIONS AND LAPLACE TRANSFORMS

(Common to all branches) [As per Choice Based Credit System (CBCS) scheme] (From the academic year 2021-22)

Course Code	21MA21	CIE Marks	50	
Credits	03	SEE Marks	50	I
Contact Hours/Week (L-T-P)	3-0-0	Total Marks	100	I
Contact Hours	42	Exam Hours	03	I

**Course Learning Objectives**: This course (**21MA21**) will enable students to master the basic tools of differential & integral calculus, differential equations and elementary linear algebra and become skilled for solving problems in science and engineering.

become skilled for solving problems in science and engineering.	
MODULE-I	
Ordinary differential equations(ODE's)of first order:-	8 Hours
Linear and reducible to linear differential equation. Exact and reducible to exact differential	
equations. Applications of ODE's-orthogonal trajectories, Newton's law of cooling and L-R	
circuits. Nonlinear differential equations; introduction to general and singular solutions; solvable	
for p only; Clairaut's and reducible to Clairaut's equations only.	
MODULE-II	9 Hours
Ordinary Differential Equations (ODE's) of higher order:-	
Differential equation of higher order with constant coefficients and examples.	
Second order linear ODE's with constant coefficients by the method of variation	
of parameters; Cauchy's and Legendre homogeneous differential equations. Initial	
and boundary value problems. Applications to oscillations of a spring and L-C-	
R circuits.	
MODULE-III	9 Hours
Partial Differential Equations(PDE's):-	
Formation of PDE's by elimination of arbitrary constants and arbitrary functions.	
Solution of non-homogeneous PDE by direct integration method. Homogeneous PDEs	
involving derivative with respect to one independent variable only. Solution of PDE's by	
the method of separation of variable.	
Application of Partial Differential Equations(PDE's):-	
Introduction, derivation of one dimensional wave equation and heat equation, various	
possible solutions of one dimensional wave equation and heat equation and Laplace	
equation by the method of separation variables and examples.	
MODULE-IV	8 Hours
Vector Calculus:-	
Vector Differentiation: Scalar and vector fields. Gradient, directional derivative;	
divergence and curl physical interpretation; solenoidal and irrotational vector fields-	
Illustrative problems.	
Vector Integration: Line integrals, Greens Theorem, Gauss Divergence Theorem and	
Stokes Theorem (Only Statements) Illustrative examples. Applications to work done by a	
force and flux.	
MODULE-V	
Laplace Transformations:	8 Hours
Defination, Transforms of elementary functions. Laplace transform of Derivatives and	

integrals and problems, periodic function and Unit step function- Illustrative problems. Inverse Laplace transforms, properties - Illustrative problems, Solution of linear differential equations.

#### **Text Books:**

- 1. B.S. Grewal: Higher Engineering Mathematics, Khanna Publishers, 43<sup>rd</sup> Ed., 2015.
- 2. E. Kreyszig: Advanced Engineering Mathematics, John Wiley & Sons, 10<sup>th</sup>Ed.(Reprint),2016.

#### **Reference books**:

- <u>http://www.class-central.com/subject/math(MOOCs)</u>
- <u>http://academicearth.org/</u>

## **Pedagogy (General Instructions):**

These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

- 1. In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons shall develop student's theoretical and applied mathematical skills.
- 2. State the need for Mathematics with Engineering Studies and Provide real-life examples
- 3. Support and guide the students for self–study.
- 4. You will also be responsible for assigning homework, grading assignments and quizzes, and documenting students' progress.
- 5. Encourage the students for group learning to improve their creative and analytical skills.
- 6. Show short related video lectures in the following ways:
  - As an introduction to new topics (pre-lecture activity).
  - As a revision of topics (post-lecture activity).
  - As additional examples (post-lecture activity).
  - As an additional material of challenging topics (pre-and post-lecture activity).

• As a model solution of some exercises (post-lecture activity). Course Outcomes: On completion of this course, students are able to: Course **CO**# **Course Outcome (CO):** At the end of the course student will be able to: Code Explain various physical models through first order and first degree ordinary CO1 differential equations and solve them by analytically Explain various physical models through second and higher order ordinary diff CO2 equations and solve them analytically 21MA21 Understand a variety of partial differential equations and solution by exact CO3 methods and apply methods of separation of variables to solve heat, wave, laplace equations. Illustrate the applications vector calculus to understand the solenoidal and CO4 irrotational vectors and also to exhibit the interdependence of line, surface and volume integrals. Apply the knowledge of Laplace transform and inverse Laplace transform to s CO5 differential equations.

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	1										1
CO2	3	1										1
CO3	3	2										1
CO4	3	1										1
CO5	3	1										1
AVG	3	1.2										1

#### Method of Examination:

Note:- The SEE question paper will be set for 100 marks and the marks scored by the student will be proportionately reduced to 50.

- The question paper will have **ten** full questions carrying equal marks.
- Each full question carries **20**marks.
- There will be **two** full questions (with a **maximum** of **four** sub questions) from each module.
- Each full question will have sub question covering all the topics under a module. The students will have to answer **five** full questions, selecting **one** full question from each module.

## ENGINEERING CHEMISTRY

(Common to all branches) [As per Choice Based Credit System (CBCS) scheme] (From the academic year 2021-22)

Course Code	21CH12/22	CIE Marks	50
Credits	03	SEE Marks	50
Contact Hours/Week (L-T-P)	3-0-0	Total Marks	100
Contact Hours	42	Exam Hours	03

#### **Course Learning Objectives:**

\*To recognize electrochemical process, evaluate electrodes and cells.

- \*To introduce the principle of corrosion, common corrosion forms, corrosion control methods and material selection to reduce corrosion cost.
- \*To provide a broad and fundamental knowledge of the polymer and their chemical and physical behaviour. Emphasis is on the processing technique along with the production of polymer. Towards the end the student is able to corelate structure-processing-properties relationship for polymers.
- \*To study various types of conventional and non-conventional energy sources including solid liquid and gaseous fuels.

\*To provide knowledge of water quality, characteristics of water sources and purification of water

POLYMER TECHNOLOGY	
MODULE-III	9 Hours
paints and their functions. Varnish, definition, differences between paints and varnishes.	
Self-Study Material: Electrochemical series, Organic coatings: paint, components of	
coper and electro less plating of Nickel	
Pedagogy: Chalk and talk method, power point presentation,-vedios Electroplating of	
nickel.	
electroplating and electro-less plating. Electroplating of copper and electroless plating of	
electroplating and electroless plating. Factors effecting electroplating and application of	
Technological importance of metal finishing. Mechanism and difference between	
metal coating (Galvanization and tinning). Corrosion Inhibitors.	
metal and differential aeration (pitting and water line), stress corrosion. Factors affecting the rate of corrosion. Corrosion control- Inorganic coating (Anodising and Phosphating)	
Definition, chemical and electrochemical mechanism. Types of corrosion – differential	
CORROSION SCIENCE & SURFACE COATING	8 Hours
MODULE-II	
Self-Study Material: Recycling of Lithium-ion batteries	
Handouts	
Pedagogy: Chalk and talk method, power point presentation, solar Energy and Fuel cells,	
Construction working and application of Li-MnO2 and Ni – Metal Hydride battery	
electrode, determination of pH using glass electrode. Numerical problems. Modern batteries –	
table. Derivation of Nearns't equation. Classification of cells- primary, secondary and concentration cells Reference electrodes- calomel electrode. Ion-selective electrode-glass	
electrode potential, Measurement of single electrode potential and emf. Electrochemical series	
Introduction, Electrode potential and EMF- definition, sign-convention., and notations. Standard	
ELECTROCHEMICAL ENERGY	9 Hours
MODULE-I	

Definition, classification with examples. Polymerization, types of polymerization (Addition and condensation) Mechanism of polymerization – Free radical with ethylene as an example. Methods of polymerization – Bulk , solution, suspension and emulsion polymerization. Glass transition temperature, factors effecting, structure and property relationship. Synthesis, properties and application of Teflon , Polyethylene HDPE, PMMA, Polyurethane . Elastomer- deficiencies of natural rubber and advantages of synthetic rubber. Synthesis and application of Neoprene, Butyl and Nitrile rubber. Adhesives- Manufacturing and application of epoxy resin. Conducting polymers-definition, Synthesis, mechanism and application of conduction in polyacetylene. Introduction to biodegradable polymers. <b>Pedagogy:</b> Chalk and talk method, power point presentation, <b>Self-Study Material</b> : Importance and disadvantages of non-biodegradable polymers, composites and nanomaterials.	
MODULE-IV	
FUELS & BATTERY TECHNOLOGY	8 Hours
Introduction, definition, classification, characteristics of fuels, calorific value – definition,	
gross and net calorific value. Determination of calorific value of a solid / liquid fuels using	
Bomb Calorimeter. Petroleum cracking – Fluidized catalytic cracking. Reforming of petrol.	
Power alcohol, Unleaded petrol and Bio-fuels Numerical problems. Fuel cells -	
Construction and working of $H_2 - O_2$ and $Me - alcohol - O_2$ (CH <sub>3</sub> OH-O <sub>2</sub> ) cells.	
Pedagogy: Chalk and talk method, power point presentation, videos on Knocking,	
Working of fuel cells. Solar cells. Handouts.	
Self-Study Material: Construction and working of Dry battery.	
MODULE-V	
<b>INSTRUMENTAL METHODS, WATER and WASTE MANAGEMENT</b>	8 Hours
Instrumentation and application of potentiometry ,conductometry (strong acid and strong	
base, weak acid and strong base), Colorimetry -theory, Beer Lambert, S Law and	
applications in uantitative analysis.	
Sources and Impurities in water, hardness and their types and Numerical Problems . BOD	
and COD, and their determination, numerical problems. Potable water- purification using	
chlorination, and reverse osmosis. Sources, characteristics and disposal methods of Solid	
waste and biomedical waste.	
Pedagogy: Chalk and talk method, power point presentation, Handouts	
Practical Topic: Conductometric titration of mixture of acids potentiometric estimation of	
FAS, Colorimetric estimation of copper,	
Self-Study Material: Principles of titrimetric analysis, requirement of titrimetric analysis,	
Classification of titrimetric analysis, Instrumental methods of analysis. Definitions of	
normality, molarity, ppm.	
Text Books:	
Engg.Chemistry by R V Gadag and Nityanand Shetty	
Engg.Chemistry by J C Kuriacose and J Rajaram	
Reference books:	
1. 1. Text book of Engg., chemistry by Jain and Jain.	
2. Text book of Engg., chemistry by M.M Uppal.	
3. Text book of Engg., chemistry by O.P Agrawal.	
4. Principles of physical chemistry by Puri and Sharma.	
5. Text book by polymer science by F.W.BillMeyer.	

6. Text book by polymer science by Gouriker.

7. Text book by Instrumental method of analysis by B K Sharma.

e-learning resources: : <u>http://www.tndte.gov.in/site/wp-content/uploads/2016/08/Engineering-</u> <u>Chemistry.pdf</u>

Course Outcomes: On completion of this course, students are able to:

Course Code	CO #	<b>Course Outcome (CO):</b> At the end of the course student will be able to:
	CO1	Demonstrate fundamentals of electrochemistry, recognize the
		electrochemical process and apply the concept of electrochemistry in industrial water electrolysis, electrolysis and electrosynthesis.
	CO2	Detect type of corrosion & apply appropriate method for managing corrosion in industries.
21CH12/22	CO3	Differentiate modern chemical method of synthesis of polymer and their applications .
	CO4	Interpret the properties of Fuels commonly used and there economics, advantageous and limitations.
	CO5	Evaluate the properties of potable water, solid waste & biomedical waste with the help of instrumental methods .

1	1		1		1	1	1		1	1		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	2										
CO2	3	2										
CO3	3	2										
CO4	3	2										
CO5	3	2										
AVG	3	2										

Question paper Pattern :

1. Each module will have two questions covering the syllabus

2. Each question consists of sub divisions (maximum four) and maximum marks is 20

3. Students have to answer one full question from each module.

## TECHNICAL ENGLISH - II

(Common to all branches) [As per Choice Based Credit System (CBCS) scheme] (From the academic year 2021-22)

Course Code	21HU23	CIE Marks	50	
Credits	02	SEE Marks	50	
Contact Hours/Week (L-T-P)	2-0-0	Total Marks	100	
Contact Hours	28	Exam Hours	02	

**Course Learning Objectives**: To enable the students to obtain the basic knowledge about oral Communication Skills - II in the following topics:-

- Meaning, Principles, Barriers and modes of Oral communication.
- . Developing Presentation skills
- . Learn Group Communication.
- . Learn Employment communication..
- . Developing interpersonal communication skills

# MODULE-I ORAL COMMUNICATION: 5 Hours Meaning, principles of successful oral communication, barriers to communication. modes of oral communication – listening as a communication skill, Non- verbal communication. Grapevine Communication – Meaning and Types of Grapevine. 5 Hours

## **MODULE-II PRESENTATION SKILLS: 6 Hours** What is a presentation – Element of Presentation – Designing and delivering Presentation. Public Speaking, Effective power point presentation, body language, Non- verbal facial expressions, Eye Contact, audience research, questions from the audience, communication of emotional intelligence, creativity in oral communication. Communication through telephonic, videoconference & skype **MODULE-III 6** Hours **GROUP COMMUNCATION :** Group Discussion – Do and Don't in Group discussion, Group Presentation. Debate – Do and Don't in Debate. Group Communication- Meetings, Notice, Planning Meetings, objectives, timing, venue of meetings, leading meetings, Minutes of meeting, press conference. **MODULE-IV**

# EMPLOYMENT COMMUNCATION :6 HoursWriting Curriculum Vitae( CV), Interview – Types of interview, candidates preparation,<br/>Interviewers Preparation, time management, grooming and Just A Minute (JAM). Speaking<br/>for better communication – Speaking about yourself6 Hours

## C PROGRAMMING FOR PROBLEM SOLVING

(Common to all branches) [As per Choice Based Credit System (CBCS) scheme] (From the academic year 2021-22)

Course Code	21CS14/24	CIE Marks	50	
Credits	03	SEE Marks	50	
Contact Hours/Week (L-T-P)	3-0-0	Total Marks	100	
Contact Hours	42	Exam Hours	03	

• Develop skills to solve computational problems

MODULE-I	
Algorithms, Flowcharts and Operators: Algorithms, Flowcharts, Basic Structure of C	8 Hours
Program, Executing a 'C' program. C tokens, Data types, Declaration of variables.	
<b>Expressions, Managing Input/ Output and Operators:</b> Arithmetic operators, relational	
operators, logical operators, assignment operators, increment/ decrement operators,	
conditional operators, bit wise operators, special operators. Evaluation of expression,	
precedence of arithmetic operators, type conversions in expression, operator precedence	
and associativity. Unformatted	
and Formatted Input and Output. Examples & exercises.	
MODULE-II	1
Control Statements: Decision Making with if statement, Simple if statement, the if else	8 Hours
and nested if statements, the else if ladder, Switch statement, Unconditional control	
Statements.	
Decision Making and Looping: While statement, Do-While statement, For statement,	
jumps in loop. Examples & exercises.	
MODULE-III	
<b>Arrays:</b> One dimensional Array, declaration, Initialization, Two dimensional Arrays notations and representations, manipulating with arrays, examples and exercises.	9 Hours
<b>Pointers:</b> Accessing the address of a variable, Declaring pointer variables, Initializing of	
pointer variables, accessing a variable through its pointer ,pointer expressions, pointer	
arrays, pointer and character strings, arrays of pointer, pointer as function arguments,	
function returning pointer ,pointers to function, pointer and structure. Examples & exercises.	
MODULE-IV	
<b>Strings:</b> Declaring and Initializing String Variables, Reading Strings from Terminal, Writing strings to Screen, Arithmetic Operations on Characters, String-handling functions, examples and exercises.	9 Hours
Functions and Recursion : Need for User-defined Functions, A multi-function	

program, Elements of User-defined Functions, Definition of functions, Return value and their types, Function calls, Function declaration, Category of functions, Recursion, examples and exercises.

Structures and Unions: Initialization. Defining a Structures, Declaration of Structure 8 Hours

variables, Accessing Structure Members, Structure Initialization, Copying and comparing structure variables, operations on individual members **Unions**: Union, Size of Structures, bit fields, examples & exercises

File Management: Defining and opening a file, closing file, input output

operations on files, error handling during I/O operations. Examples & exercises.

#### **Question paper pattern:**

The question paper will have ten questions.

There will be 2 questions from each module, covering all the topics from a module.

The students will have to answer 5 full questions, selecting one full question from each module. **Text Books:** 

1. E. Balagurusamy, "Programming in ANSI C", Tata Mcgraw Hill Education Private Limited– V Edition, 2016

#### **Reference books**:

- 1. 1E Balagurusamy, Computing Fundamentals and C Programming, McGraw-Hill Education, Reprint 2<sup>nd</sup> Edition 2008.
- 2. Herbert Schildt, "Complete Reference in C", Fourth Edition, Tata McGraw Hill Publication, 2017
- 3. Yashwant P. Kanetakar, "Let us C", Fifth Edition, BPB Publications, 2016.
- 4. Brian W Kernighan & Dennis M Ritchie "The C Programming Language", Prentice Hall Publisher, Second Edition, 2004.

5. Behrouz A.Forouzan and Richard F.Gilberg, "Computer Program: A structured programming Approach Using C.", Third edition, Thomson Learning, 2005. E-Books and Online resources:

Course Code	CO #	<b>Course Outcome (CO):</b> At the end of the course student will be able to:
	CO1	Develop Algorithm and flowcharts and understand the different data types an in C language
21CS14/24	CO2	Identify and use proper decision /control constructs for solving different type problems
	CO3	Apply arrays and pointers to develop programs for a given problem.
	CO4	Demonstrate the Strings and modular programming concepts
	CO5	Create a solutions for real world problem using Structures and file operations

# MECHANICAL ENGINEERING SCIENCE

(Common to all branches)

[As per Choice Based Credit System (CBCS) scheme]

(From the academic year 2021-22)

Course Code	21ME16/26	CIE Marks	50
Credits	03	SEE Marks	50
Contact Hours/Week (L-T-P)	2-0-2	Total Marks	100
Contact Hours	(28H.Theory+28H .Practical)	Exam Hours	03

### **Course Learning Objectives:**

1.Learn the fundamental concepts of energy, its source and conversion and basic concepts of thermodynamics.

2.Understand the, properties of stream and use of steam table.

3.Understand the working of IC engines and concepts of refrigeration.

4.Understand the working of conventional machine tools and welding process.

5.Learn the fundamentals of Mechatronics and its applications

MODULE-I	
Energy source and basic thermodynamics:	5 Hours
Energy sources like fossil fuels, Hydel, nuclear, solar, wind, environmental issues like	Theory
global warming and ozone depletion, remedies of global warming. Basic concept of	
thermodynamics: Laws of thermodynamics.	
MODULE-II	
Properties of steam:	8 Hours
Formation of steam at constant pressure (temperature enthalpy diagram). Use of stream	Theory
tables to calculate enthalpy, internal energy etc (simple problems).	
MODULE-III	7 Hours
IC Engines: Otto and diesel cycle, 2 stroke and 4stroke, petrol and diesel engines, simple	Theory+
problems.	12 Hours
Refrigeration: Unit of Refrigeration, C.O.P, vapour compression system and vapour	Practical
Absorption systems, properties of refrigerants.	
MODULE-IV	
<b>Conventional machining:</b> lathe-principle of working, lathe operations, drilling M/C- principle of operation of radial drilling M/C, drilling operations. Joining process, principle of arc and gas welding. Milling machine, working principle of milling machine, classification of milling machine.	16 Hours Practical
MODULE-V	
<b>Mechatronics:</b> Definitions, systems of Mechatronics, measurements systems, control systems. Examples of open loop and closed loop control systems, microprocessor based controller.	8 Hours Theory
<b>Computer Numerical Control (CNC):</b> Introduction components of CNC,open loop and	
closed loop systems, advantages of CNC,CNC machining centers and turning centers.	
<b>Robots:</b> Robot anatomy, joints and links, common robot configurations. Applications of robots in material handling, processing and assembly and inspection.	
Text Books:	
I EXI DOOKS:	

1. A Text Book of Elements of Mechanical Engineering – KR Gopalkrishna, Subhash Publishers, Bengaluru.

2. Elements of Workshop Technology, Vol. I & II – SKH Choudrhy, AKH Chowdhary & Nirjar Roy, 11<sup>th</sup> Edn., Media Promoters & Publishers, Mumbai.

### **Reference books**:

1. A Text Book of Elements of Heat Engines – RC Patel & CJ Karamchandani, Charotar Publishers, Anand.

# E-Books and Online resources:

# NPTEL/SWAYAM/MOOCS:

### **Pedagogy :-**

The topic or concept-wise pedagogy (Teaching Methodology) of the curriculum shall be specified in the content.

### **Question paper pattern:**

1. Total of Ten Questions with two from each MODULE to be set covering the entire syllabus.

2. Five full questions are to be answered choosing at least one from each MODULE.

3. Each question should not have more than 4 sub divisions.

Course Code	CO #	<b>Course Outcome (CO):</b> At the end of the course student will be able to:				
	CO1	Identify the different sources of energy, their conversion process and thermodynamics.				
21ME16/26 CO2 Learn the using steam tables various properties of steam						
	CO3	Know the working of IC Engines and concept of refrigeration.				
	CO4	Know the working of conventional machine tools and welding process.				
	CO5	Understand important of mechatronics and its applications and Describe manufacturing system.

# ENGINEERNG MECHANICS (Common to all branches)

[As per Choice Based Credit System (CBCS) scheme]

(From the academic year 2021-22)

Course Code	21CV17/27	CIE Marks	50
Credits	03	SEE Marks	50
Contact Hours/Week (L-T-P)	3-0-0	Total Marks	100
Contact Hours	42	Exam Hours	03

# Prerequisite: Physics and Mathematics

**Course Learning Objectives**:

# To enable the Student to acquire the knowledge in the following topics

- 1) Understanding and solving the problems involving forces, loads and reactions, Moments and its applications of concurrent force system.
- 2) Solving the problems of couples and equilibrium of bodies.
- 3) To determine support reactions and friction of rigid bodies on horizontal and inclined planes.
- 4) To determine the center of gravity and moment of inertia of planar sections.
- 5) To study the concept of work, power & energy.

<i>s</i> To study the concept of work, power activity.	
MODULE-I	
Introduction to Engineering Mechanics, force Systems, Basic concepts, Particle equilibrium; Rigid	8 Hours
Body equilibrium; System of Forces; Coplanar Concurrent Forces, Composition and resolution of	
force systems, Resultant force, Moment of Forces and its Application; law of transmissibility of	
forces, Application based numerical examples	
MODULE-II	
Varignon's theorem of moments Couple system, equivalent force couple system, composition of coplanar non concurrent force system, Resultant of Force System, Equilibrium of System of Forces, Free body diagrams, Equations of Equilibrium of Coplanar Systems and conditions of equilibrium law of superposition of forces. Application based Numerical examples	9 Hours
MODULE-III	8 Hours
Types of supports, types of loads, concept of statically determinate and indeterminate beams,	
support reactions for statically determinate beams.	
Friction, Types of friction, Limiting friction, Laws of Friction, Static and Dynamic Friction;	
Impending motion on horizontal and inclined planes, wedge friction, ladder friction. Application	
based Numerical examples	
MODULE-IV	
Centroid of plane figures, Centroid of simple figures from first principle, centroid of composite sections; Centre of Gravity and its implications; locating the centroid of triangle, semicircle, quadrant of a circle and sector of a circle, centroid of the simple built sections & composite sections,	9 Hours
Moment of inertia concept, Moment of inertia of plane sections from first principles, Theorems of moment of inertia, Moment of inertia of standard sections and composite sections. Numerical examples	
MODULE-V	
Work, Power & Energy, Introduction, Work of a force, Energy of a particle, principle of work &	8 Hours
energy for a system of particles, Potential energy and conservative forces, principles of conservation of energy, Power. Application based Numerical example	

### **Question paper pattern:**

Two questions to be set from each Module by intermixing (in total 10). Students have to answer any five full questions by selecting one question from each module.

### **Text Books:**

1. S.S.Bhavikatti, "Elementsofcivilengineering", Vikaspublishinghouse Pvt. Ltd., New Delhi.

2.Jagadeesh T.R. and Jayaram, "Elements of civil engineering", Sapna Book House, Bangalore.

3. A.K. Tayal, "Engineering mechanics (Statics & Dynamics)", Ninth edition, Umesh publications, New Delhi.

### **Reference books**:

- 1. TimoshenkoandYoung, EngineeringMechanics", McGrawBookCompany, New Delhi.

# ENGINEERING CHEMISTRY LABORATORY

(Common to all branches)

[As per Choice Based Credit System (CBCS) scheme]

(From the academic year 2021-22)								
21CHL11/21	CIE Marks	50						
01	SEE Marks	50						
0-0-2	Total Marks	100						
28	Exam Hours	03						
	21CHL11/21 01 0-0-2	21CHL11/21CIE Marks01SEE Marks0-0-2Total Marks						

**Course Learning Objectives**: To enable the students to obtain the knowledge of Engineering Chemistry Practical in the following topics.

- . Hardness Determination
- . Analysis of alloy, metal and cement
- . Determination of COD
- . Estimation of strength of acids

### PART-A

- 1. Determination of total hardness of water using standard EDTA
- 2. Determination of percentage of copper in brass
- 3. Determination of iron using internal indicator method
- 4. Determination of COD of waste water
- 5. Determination of chloride in water by precipitation method

### PART – B

- 1. Potentiometric method of estimating iron
- 2. Colorimetric determination of copper
- 3. Conductometric estimation of acid (HCl) using standard NaOH.
- 4. Determination of dissociation constant (pKa) of weak acid.
- 5. Determination of viscosity of Polymeric solution Ostwald viscometer.

### Text Books:

1. Departmental Chemistry Manual.

Reference books:

- 1. Text book of Quantitative analysis by A. I. Vogel.
- 2. Practical's of physical Chemistry by J. B. Yadav

# **Examination Pattern:**

1. Students have to perform two experiments one from part-A and one from part-B

Course Code	СО	Course Outcome (CO): At the end of the course student will be able to:
	CO1	Explain the concepts engineering chemistry theory course through series of experiments
	CO2	Share the responsibilities in small batches of 4-5 students in operating the instruments and conduct the experiments
21CHL11/21	CO3	Determine the properties by conducting series of experiments.(L3)
	CO4	Analyze the data obtained from the experiments and interpret the results.(L4)
	CO5	Write a well organized laboratory report.(L3)

numbers) from 1 to N using	ng for loop.										
Series: 1/1!+2/2!+3/3!+4/4	Series:1/1!+2/2!+3/3!+4/4!N/N!										

4.	Write a	C program to	print following	g pyramid using	for loop
			C		1

5. a. Write a C program to check whether a character is VOWEL or CONSONANT using switch

- b. Write a C program to calculate area of different shapes like square, rectangle, triangle using switch.
- 6. Write a C program to find a smallest and Largest element in a one dimensional array.
- 7. Write a C program to perform linear search and find position using array.
- 8. Write a C program to read a Matrix, Print diagonal elements and find sum of diagonals.
- 9. Write a C program to count the number of lines, words, character in a given text
- 10. Write a C Program to compute the monthly pay of N Employees using each employee's name, basic Pay, DA HRA. The DA and HRA 80% and 30% of Basic Pay respectively. Gross salary is computed by adding DA, HRA to Basic Pay, Store all the details in an array of Structures and Print the name and Gross salary of Each employee
- 11. Write a C program to find largest element using pointers and functions
- 12. Write a C program to pass 2D array to a function and find product of two Matrices
- 13. Write a C program to perform conversion of decimal number to binary number using recursive function.
- Consider the details of N faculty details consisting of Name, Employee Id, Department, address & salary. Create a file to store the above details. Retrieve the contents of file to perform the following details as
- i) Display the details of the faculty based on salary range entered.
- ii) Display the details of faculty based on employee id entered.
- iii) Write a C program to input a Domain name of email id and search for the same in the file, contact.txt, and update the existing email id with new one.

### Note:

1. All the programming exercises shall be conducted using C programming language under UBUNTU Operating System.

2. Part A programs for Practice.

3. Part B Programs for SEE

Course Code	СО	<b>Course Outcome (CO):</b> At the end of the course student will be able to:
	CO1	Identify the programming constructs and apply appropriate control / decision sta given problem
	CO2	Develop C programs to solve computational problems using Strings and Arrays.
21CSL12/22	CO3	Develop application using pointer.
	CO4	Implement modular programming and user defined data types
	CO5	Develop solutions for real world problems using file operations

Specification and variation, <b>Types and features of Motherboard form factors</b> - ATX, Micro-ATX, Mini-ITX, Nano-ITX, and Pico-ITX. <b>Functional components of Motherboard:</b> CPU and CPU socket-Types of sockets; Overview of micro architecture of INTEL and AMD CPU. <b>MODULE-II</b> <b>I/O devices and Interfaces</b> Types of I/O devices and ports on a standard PC for connecting I/O devices. removing the battery from motherboard.	
Memory– Memory Units (B, KB, MB,GB, TB), memory locations	
RAM Technology- SDRAM, DDR, DDR2, DDR3, DDR4.	
Mass storage media- Hard drive, Principle of working, Causes of Hard drive failure;	
Signs of failure; Backup and recovery of data.	
MODULE-IV	<b>A XX</b>
11	3 Hours
Need for SMPS, Specifications, Rating of SMPS based on type of motherboard and	
devices used (AT/ATX, Micro ATX, mini ATX, higher watts PSU for gaming PC), color	
coding adopted, Types of connectors used- ATX, ATX12V, Molex, SATA, PCIe.	
Symptoms of SMPS failure: Common problems from a faulty SMPS, Trouble	
shooting Power supplies.	
MODULE-V Windows 8 /10 OS Installation: Windows versions history. Installation	3 Hours
Windows 8 /10 OS Installation: Windows versions history, Installation,	5 Hours
understanding Windows environment, installation of network, installation of drivers for camera, printers etc. Creating user accounts Installation of	
MS-Office and other general software. Backup/Restore Windows partition with the bootable image.	

Course Outco	omes: On	a completion of this course, students are able to:					
Course Code	CO	Course Outcome (CO)					
21AE191	CO1	Familiarize the Functional components of Motherboard					
	CO2	Develop understanding of the I/O devices and Interfaces					
	CO3	Identify the various Chipsets, Memory, RAM Technology Mass storage media					
	CO4	Understand the features of Power supplies and troubleshot of SMPS failure					
	CO5	Install the Windows 8 /10 OS Installation

signs Precautions Against Electric Sho Unused wall outlets should be se and stuck in the mouth. Consid being inserted. You can also bl you're temporarily using extensi device. You can also put electric devices such as DVD players of and kitchen electrical appliances children.	cured. Plastic inse ler using safety o ock outlets with t on cords, hide the ical tape over unu n a shelf out of re-	rts can be used but utlets that prevent he creative arrange on behind furniture used plug holes on ach, or behind a ba	foreign objects from ement of furniture. If e or use a hide-a-cord a cords. Put electrical arrier. Store bathroom	3 Hours
<ul> <li>It's vitally important to take safe not be compromised and some g regarding the safe handling of e with electricity.</li> <li>1. Avoid water at all times when electrical equipment or circu electric current.</li> <li>2. Never use equipment with fray</li> <li>3. If you are working on any realso a good idea to put up a sign ON by accident.</li> <li>4. Always use insulated tools wh</li> <li>5. Electrical hazards include exp which may become energized up like "Shock Risk". Always be established by the electrical code</li> </ul>	n working with ele uits with wet han ved cords, damaged ceptacle at your ho on the service pa ile working. posed energized pa nexpectedly. Such e observant of su	en working with el to be followed first nted below will hel ectricity. Never touc ds. It increases the d insulation or brok ome then always tu nel so that nobody arts and unguarded equipment always uch signs and fol	. The basic guidelines lp you while working ch or try repairing any e conductivity of the en plugs. rn off the mains. It is turns the main switch l electrical equipment carries warning signs	3 Hours

6. Always use appropriate insulated rubber gloves and goggles while working on any branch	
circuit or any other electrical circuit.	
7. Never try repairing energized equipment. Always check that it is de-energized first by	
using a tester. When an electric tester touches a live or hot wire, the bulb inside the tester	
lights up showing that an electrical current is flowing through the respective wire. Check all	
the wires, the outer metallic covering of the service panel and any other hanging wires with	
an electrical tester before proceeding with your work.	
8. Never use an aluminum or steel ladder if you are working on any receptacle at height in	
your home. An electrical surge will ground you and the whole electric current will pass	
through your body. Use a bamboo, wooden or a fiberglass ladder instead.	
9. Know the wire code of your country.	
10. Always check all your GFCI's once a month. A GFCI (Ground Fault Circuit Interrupter) is a	
RCD (Residual Current Device). They have become very common in modern homes, especially	
damp areas like the bathroom and kitchen, as they help avoid electrical shock hazards. It is	
designed to disconnect quickly enough to avoid any injury caused by over current or short circuit faults.	
MODULE-IV	
Protection against Electrical Hazards:	3 Hours
1. Observe the system without touching it. The person may still be in contact with	
the electrical source. Touching the person may pass the current through you.	
2. Call or have someone else call 911 or emergency medical <b>help</b> .	
3. Turn off the source of electricity if possible. If not, move the source away from	
you and the affected person using a non-conducting object made of	
cardboard, plastic or wood.	
4. Once the person is free of the source of electricity, check the person's	
breathing and pulse. If either has stopped or seems dangerously slow or	
shallow, begin cardiopulmonary resuscitation (CPR) immediately.	
5. If the person is faint or pale or shows other signs of shock, lay him or her down	
with the head slightly lower than the trunk of the body and the legs elevated.	
6. Don't touch burns, break blisters, or remove burned clothing. Electrical shock	
may cause burns inside the body, so be sure the person is taken to a doctor.	
MODULE-V Video Presentations on Electrical Sofaty	3 Hours
Video Presentations on Electrical Safety.	5 Hours
Question paper pattern:: Total ten questions will be asked. Two from each module. The student ha	s to answer
five questions, selecting at least one from each module.	
Text books:	
1.Essential System Administration, by by Aeleen Frisch, 3rd Edition

- 2. The course certificate is to be submitted to the concerned after completion.

# Hyderabad Karnataka Education Society's Poojya Doddappa Appa College of Engineering

(An Autonomous Institution &Affiliated to Visvesvaraya Technological University, Belagavi) Aiwan E-Shahi Area KALABURAGI 585 102 Karnataka India

# CURRICULUM

# FOR B.E.III SEMESTER AND IV SEMESTER

FOR THE ACADEMIC YEAR 2022-23

DEPARTMENT OF CIVIL ENGINEERING

# **About College:**

Poojya Doddappa Appa College of Engineering (PDACE) is the first institution of Hyderabad Karnataka Education (HKE) Society, Kalaburagi, which was established in the year 1958. The foundation stone of this college was laid by the then Vice President of India Dr.Sarvapalli Radhakrishnan in 1958.

At present, PDA College of Engineering is offering 11 UG programs, 10 PG Programs and 12 Research centers, spreading and imparting technical education in North Karnataka Region. The college has state of the art laboratories, digitalized smart class rooms having highly qualified and experienced faculty with highest no. of Ph.D. and M. Tech degrees.

PDACE is the only Autonomous Institution in the region, which was sponsored under TEQIP I , TEQIP-II and TEQIP-III from World Bank and received grants of Rs.10.43 crores, Rs. 17.5 crores and 7 crores respectively. This is one among 12 institutions having TEQIP-I and TEQIP -II sponsorship. At present, college is selected in TEQIP-III as Mentor Institution for Bundelkhand Institute of Engineering & Technology, Jhansi.

The Vision and Mission of PDA College of Engineering are as mentioned below.

# VISION

• To be an institute of excellence in technical education and research to serve the needs of the industry and society at local and global levels.

# MISSION

- To provide a high-quality educational experience for students with values and ethics that enables them to become leaders in their chosen professions.
- To explore, create and develop innovations in engineering and science through research and development activities.
- To provide beneficial service to the national and multinational industries and communities through educational, technical and professional activities.

### **About Department of Civil Engineering**

The Civil Engineering Department was established in the year 1958 with an intake of 60 students. In 1994 the intake was increased to 90 and further increased to 180 in the year 2014.Presentlythe department runs both UG and PG (Environmental Engineering and Structural Engineering) programs with intake of 180 in UG program and 18 in each PG program. Department is recognized as Research Centre by Visvesvaraya Technological University Belagavi in the year 2002 and at present 35 research scholars are pursuing their Ph.D. and seven research scholars have been awarded with Ph D degree.

The Department has signed MoU with various industries like Medini, Sharan Technical consultancy, Canter Technologies Pvt. Ltd, Sharan Chandra Consultant, JGD Consultants, Jalavahini Management Services Pvt. Ltd. Dharwad, Shah Technical Consultants Pvt. Ltd., PP Raju & Co., Design Consortium, KRIDL, Bharath Dal and Oil Industries, Ultratech, ACC, Alstom, Karnataka State Pollution Control Board & HCC. These MoUs have helped the students in getting exposure to industrial environment and also for conducting Industry Institute Interaction events.

The Vision, Mission and Program educational objectives of Civil Engineering Department are as follows:

#### VISION

• To be the preeminent department for imparting technical knowledge and skills in the Civil Engineering field to meet the social, industrial, environmental and research needs at local and global levels.

### MISSION

- To provide technical education to meet the challenges in the profession through a well-structured curriculum.
- To inculcate innovation and research ideas for sustainable development with ethical background.
- To impart entrepreneurial skills for serving the needs of the society through technical and professional activities.
- To create Civil Engineering professionals to serve the needs of the industry at local and global levels.

### **PROGRAM EDUCATIONAL OBJECTIVES(PEO'S)**

Program educational objectives are broad statements that describe the Career and Professional accomplishments that the program is preparing graduates to achieve. The program educational objectives of the B.E. in Civil Engineering Program at PDA College of Engineering, Kalaburagi are:

**PEO1:** To provide the knowledge of mathematics, science and engineering fundamentals for solving civil engineering problems.

**PEO2:** To enable the graduates to exhibit their technical knowledge and skills of recent practices to identify and solve civil engineering problems.

**PEO3:** To enable the graduates to conduct and interpret the results of laboratory/ field experiments in basic sciences, engineering sciences and civil engineering.

**PEO4:** To enable the graduate for pursuing higher education and lifelong learning.

**PEO5:** To enable the graduates to acquire communication, team work and entrepreneurial skills along with the values of professional ethics.

### **PROGRAM OUTCOMES**

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

2. Problem analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### **PROGRAM SPECIFIC OUTCOMES**

The Civil Engineering graduates are able to:

**PSO1**: Plan, Analyze and Design buildings, Water supply and Sewerage systems, Hydraulic structures and Transportation infrastructure using sustainable materials and conceptual knowledge of Geotechnical engineering.

**PSO2**: Conduct survey and Laboratory experiments/ field investigations and interpret the data for application to real life problems.

**PSO3:** Prepare detailed estimate of civil Engineering works and Execute the civil Engineering Projects with optimum resources using effective communication skills and Professional ethics

Course Titl	e: Numerical Analysis & Statistical Methods	
Course Code	21MA31 CREI	DIT: 03
Lecture Hours/Week	3 Hrs. (Theory) SE	E: 50
Total Lecture Hours: 42	CIE: 50 SEE: (	3 Hours
Prerequisite: Differential calculus, I	ntegral calculus and Differential equations.	
<ul> <li>in the following topics</li> <li>1. Numerical methods to solve</li> <li>2. Interpolation methods, Num</li> <li>3. Numerical solutions ordinate</li> <li>4. Curve fitting by the method</li> </ul>	of least squares and correlation	
5. Introduction to theories of fu	unctions of complex variables and contour integration	
	Modules	Teaching Hours
	Module-I	
Raphson method and Regula falsi n Finite differences: Forward and B Backward interpolation formulae	nscendental Equations: Bisection method, Newtonethod. ackward differences, Interpolation, Newton's Forward and examples. Langrange's interpolation and involves. (All formulae and rules without proof).	and 9 hours
	Module II	
Numerical differentiation: Nu	merical differentiation using Newton's forward	and
backward interpolation formulae a	•	ζth
backward interpolation formulae a	ion, Trapezoidal rule, Simpson's 1/3 <sup>rd</sup> , Simpson's 3/	8 <sup>th</sup> 9 hours

Taylors series method, Runge –Kutta method of fourth order, modified Euler's method and Milne's-Thomson's predictor and corrector methods and problems.(all formulae without

proof RBT Levels: L1, L2 & L3

Module III

Statistical methods:	
Curve fitting by the method of least squares: Straight-line, second-degree parabola and the	
curves of the form $y = ab^x$ , $y = ax^b$ and $y = ae^{bx}$ .	
Correlation and lines of regression, angle between two regression lines and Rank correlation	
RBT Levels: L1, L2 & L3	
Module IV	
Functions of Complex variables: Introduction, limit, continuity, differentiability-	
Definitions. Analytic function, Cauchy-Riemann equations in Cartesian and polar forms.	0.1
Applications of analytic function. Conformal transformation. Discussion of transformations:	8 hours
W=z <sup>2</sup> , W=e <sup>z</sup> . Bilinear transformations and problems	
RBT Levels: L1, L2 & L3	
Module V	
Complex integration: line integrals, Cauchy's theorem, Cauchy's integral formula. Taylor's	
and Laurent's series (Statements only). Singularities, poles, residues, Cauchy's residue	9 hours
theorem. (Statement only) and problems	
RBT Levels: L1, L2 & L3	
Assessment and Evaluation	
The Scheme of Assessment will have two parts, namely;	
I. Continuous Internal Assessment (CIE) and	
II. Semester End Examination (SEE)	
Assessment and Evaluation of each Course shall be for 100 marks. Continuous Internal Asses	sment (CIE
and Semester End Examination (SEE) of UG Engineering programs shall carry 50:50 marks	respectivel
(i.e., 50 marks internal assessment; 50 marks semester end examination).	
The 50 marks of internal assessment shall comprise of: Internal Test 40 marks and Assignment	s / Seminar
/ Slip test / Quizzes etc. 10 marks	
There shall be three Internal Tests conducted as per the calendar of events. The students shall a	attend all th
Tests compulsorily.	
Question paper pattern:	
The SEE question paper will be set for 100 marks and the marks scored by the student will be pro	portionatel
reduced to 50.	
• The question paper will have ten full questions carrying equal marks.	
• Each full question carries 20marks.	
• There will be two full questions (with a maximum of four sub questions) from each	modulo

• Each full question will have sub question covering all the topics under a module.

The students will have to answer five full questions, selecting one full question from each module.

Maximum Shear Stress and their plane (Analytical method)

THIN AND THICK CYLINDERS:	
THIN CYLINDERS: Determination of Longitudinal and Circumferential/Hoop's stress,	
change in dimensions and volume	
THICK CYINDERS: Assumptions, Lami's equation derivation and problems, radial pressure	
and hoop stress distribution diagrams.	
Module III	
SHEAR FORCE AND BENDING MOMENT IN BEAMS:	
Introduction to types of loads, beams and support with reaction. Definition of Shear force and	
bending moment, sign conventions. Relationship between load intensity, bending moment and	8 hours
shear force. Shear force diagram (SFD) and Bending moment diagram (BMD) for simply	
supported beams (both without overhang and with overhangs) and cantilever beams, beams	
subjected to point loads, UDL, UVL, Couples and their combinations.	
Module IV	
BENDING STRESSES AND SHEAR STRESSES IN BEAMS.	
BENDINF STRESSES: Assumptions, Bernoulli's theory of Pure Bending, relationship	
between bending moment, bending stress and radius of curvature, Moment of Resistance,	
Section Modulus, flexural rigidity, Modulus of rupture. Bending stress diagram for	
rectangular, circular, 'I', 'T' and 'L' sections (simple problems)	
SHEAR STRESS: Expression for transverse shear stressing beams, Shear stress diagram for	8 hours
rectangular, circular, 'I', 'T' and 'L' sections.	
TORSION OF CIRCULAR SHAFTS:	
Equation for theory of pure Torsion, Assumptions, Torsion equation for circular shaft, Strength	
and stiffness, torsional rigidity, polar modulus, strengths of solid and hollow shafts, power	
transmitted by solid and hollow shafts.	
Module V	
ELASTIC STABILITY OF COLUMNS AND STRUTS.	
Introduction to short and long columns. Definition of effective length, slenderness ratio, radius	
of gyration, buckling/critical load. Assumption and derivation of Euler's Buckling load for	8 hours
different end conditions. Problems and limitations of "Euler's theory. Rankine's theory,	
numerical problems.	
DEFLECTION OF BEAMS:	

Definition of stiffness, elastic curve, deflection in simple bending, relation between curvature,	
slope and deflection. Double Integration method for cantilever and simply supported beams	
for point load, UDL, UVL and couple, Macaulay's method, numerical problems.	
Question paper pattern:	

Two questions to be set from each Module by intermixing (in total 10). Students have to answer any five full questions by selecting one question from each module.

Text books:

1. S.S.Bhavikatti "Strength of Materials", New age Publications

2. B.S. Basavarajaiah, P Mahadevappa "Strength of Materials" in SI Units, University Press (India) Pvt. Ltd., 3rd Edition (2010)

3. Shesha Prakash MN and Suresh GS, Mechanics of Materials, Prentice Hall, New Delhi, 2011

4. R.Subramanian "Strength of Materials" Oxford University Press. 3rdEdition (2016)

Reference Books:

1. D.H. Young, S.P. Timoshenko "Elements of Strength of Materials "East West Press Pvt. Ltd., 5th Edition (Reprint 2014)

2. S.S. Rattan "Strength of Materials" McGraw Hill Education (India)Pvt. Ltd., 2nd Edition (Sixth reprint 2013).

E books and online course materials:

www.civilenggebooks.com

Course outcomes:

On completion of the course, the student will have the ability to:

Course Code	CO #	Course Outcome (CO)
	CO1	To Understand about simple stress and strains with their relationship. determine the deformation of composite bars due to loads and temperature stress.
	CO2	To explain about the compound (complex) stress for 2D elements both by analytical and graphical methods. To determine principal stresses and their planes, evaluate different stresses acting on thin and thick cylinder.
21CV32	CO3	To analyze and draw SFD and BMD for beams with various end conditions and loads.
	CO4	To estimate and draw the bending stress, and shear stress diagram in the beams of various cross sections
	CO5	To determine the torsion and design the shafts to evaluate to slope and deflection of beams subjected to various loads by double integration and Maculay's method. To determine bulking loads for columns with different end conditions.

	FLUID MECHANICS	
Course Code	21CV33 C	REDIT:03
Lecture Hours/Week	3 hrs (Theory) SEE	: 50 Marks
Total Lecture Hours: 42	CIE: 50 Marks SEI	E:03Hours:
Prerequisite: Engineering Mathem	natics, Engineering Mechanics.	
Course objectives:		
To enable the student to acquire	the knowledge in the following topics	
1. Distinction between solid, flui	d, liquid and gas. Classify the fluids and measurement	s of pressure by
various types of manometers.		
2. Hydrostatic forces on vertical,	inclined and curved surfaces. Dynamics of fluid flow	
3. Types of flows in pipes and hea	ad loss in pipe due to friction and bends. Impact of Jets	
4. Measurement of flow through a	orifice, notches and weirs. Pumps	
5. Analyse Open Channel flow, D	imensions & Model studies	
	Modules	Teaching Hours
	Module I	
Scope and importance of the sub	oject. Definition of fluid, distinction between a solid and	l a
fluid, distinction between a liquid a	nd a gas, Fluid continuum. Fluid properties and classificat	on
of Fluids: Mass density, specific vo	plume, specific weight, relative density, viscosity, Newto	n's
Law, compressibility, surface tensi	on and capillarity and their units (SI systems)	8 hours
Pressure at a point in a static fluid	d - Pascal's law - Hydrostatic Pressure law, Atmosphe	ric
pressure, Absolute, gauge, and	vacuum pressure, Simple U-tube manometer, U-tu	be
Differential manometers, inverted	U-tube monometer.	
	Module II	
Hydrostatics: Hydrostatics Forces	on vertical & inclined plane surfaces, Hydrostatic forces	on
curved surfaces and center of pres	sure, pressure diagrams. Applications of total pressure a	nd
center of pressure on Dams, Roller	gates, Tainter gates, sector gates, Sluice gates and press	ıre
diagrams.		8 hours
<b>Dynamics of Fluid Flow</b> : Euler's e	equation of motion in one dimension – Integration of Eule	r's
equation, Bernoulli's equation, I	imitations and modifications of Bernoulli's equation	-
Applications of Bernoulli's equation	on, Pitot tubes, Venturi meter	

Module III	
Flow Through pipes: Types of flows in pipes, Reynolds's experiments – Reynold's number	
Laminar & turbulent flows, fluid friction in pipes - Head loss due to friction (Darcy Weisbach	
equation) Friction factors for commercial pipes, Minor losses in pipes, pipes in series,	
equivalent pipe and pipes in parallel, Introduction to Impulse - momentum equation and its	0.1
application on pipe bend.	8 hours
Impact of jets on vanes: Force exerted by a jet on a fixed target, Derivations. Force exerted by	
a jet on a moving target, Derivations. Force exerted by a jet on a series of curved vanes. Force	
exerted by a jet on hinged plate. Problems on above derivations.	
Module IV	
Flow measurements: Flow through a small orifice. Hydraulic coefficients and experimental	
methods of determination. Flow through large rectangular orifices, submerged orifices. Flow	
through mouth pieces, external cylindrical mouth piece, hydraulic co-efficient, flow through	
internal or re-entrant Borda's mouth piece. Classification of Notches & weirs, Flow over	
rectangular Notch, Triangular Notch or weir Trapezoidal Notch, stepped Notch, Velocity of	9 hours
approach, Francis formula Flow, Cipolletti weir or Notch, Broad crested, ogee weir, submerged	
weir, effect on discharge over a rectangular weir due to error in the measurement of head.	
Definition of pump, difference between pump & turbine, classification, Description & general	
principle of working, priming & methods. Work done & efficiencies of a centrifugal pump	
Module V	
<b>Open channel flow</b> : Introduction to open channels, classification, difference between pipe flow	
& open channel flow, types of flow, geometric properties of open channels, Uniform flow in	
open channels, Chezy's and Manning's formulae, Problems on uniform flow, Most economical	
section of open channel flow, Derivation of conditions for most economical rectangular,	
triangular and trapezoidal sections. Problems on most economical sections. Most economical	
circular channels derivations and problems,	9 hours
Dimensional analysis & model similitude: Introduction to Dimensional Analysis unit &	
dimensions, Table of Dimensions, Dimensional Homogeneity, Methods of Analysis, Rayleigh's	
& Buckingham's method. Problems on Rayleigh's & Buckingham's methods, Model Studies,	
Introduction, Similitude, Dimensionless parameters. Types of models. Froude's models theory	
& problems. Reynolds models, Problems, Scale effects.	

Two questions to be set from each Module by intermixing (in total 10). Students have to answer any five full questions by selecting one question from each module.

### Course outcomes: On completion of the course, the student will have the ability to:

Course Code	CO #	Course Outcome (CO)	Blooms Level
	CO1	Identify basic properties of Fluids, measurement of fluid pressure	C2
	CO2	Analyze fluid pressure forces and design sluice gates, roller gates etc. Apply Bernoulli's equation & its application on fluid flow problems	C4
21CV33	CO3	Analyze fluid flow through pipes, impact of jets on fluid machines.	C3
	CO4	Apply fluid flow phenomenon in flow measurement through orifices, mouth piece, notches and weirs	C2
	CO5	Identify basic principles of flow through open channels and organize the design parameters based on model studies.	C3

	SURVEYING		
Subject Code	21CV34	Credi	t 03
Number of Lecture Hours/Week	3Hours (Theory)	SEE:	50
Total Hours: 42	CIE: 50	SEE Hour	·s: 03
Prerequisite: Mathematics.			
Course objectives:			
To enable the student to acquire	e the knowledge in the following	topics	
1. Understand the concept of sur	veying and leveling.		
2. Identify the components of su	rveying and leveling.		
3. Interpret the different measure	ement techniques for various appli	cations.	
4. Apply principles of surveying	for solving relevant engineering p	problems.	
	Modules		Teaching Hours
	Module-1		
INTRODUCTION: Surveying,	Objectives and importance of sur-	veying. Classification of	
surveys. Principles of surveying	. Units of measurements, Surve	ying measurements and	
errors, types of errors, precision a	nd accuracy. Topographic maps.		
CHAIN SURVEY- Fundamental	terms, chain types & Tape types,	booking of chain survey	
work, Field book, entries, Conver	ntional symbols, Obstacles in chair	n survey.	
MEASUREMENT OF DIREC	CTIONS: Compass survey: Basi	c definitions; Types of	9 Hours
meridians, bearings and their typ	bes, magnetic and true bearings. I	Prismatic and surveyor's	
compasses, temporary adjustmen	ts, declination and Dip. Quadranta	al bearing system, whole	
circle bearing system, local attra	action and numerical problems, l	atitudes and departures-	
consecutive coordinate method.

	elling, Fundamental axes and p		
	ant adjustments i.e., two peg test or		
of leveling - Simple leveling, Profile leveling and Cross sectioning, fly leveling. Computation			9 Hours
-	nethod and Height of instrument	t method - comparison,	
Arithmetic checks. Numerical pro			
	Module-3		
	s and their characteristics, Method	-	
and indirect methods (squares an	nd cross section methods), contou	ar interpolation, Uses of	8 Hours

contours.	
AREAS AND VOLUMES: Computation of area and volume by trapezoidal, Simpson rules	
and prismoidal formulae. Planimeter- Principle, working and uses, Digital Planimeter.	
Module-4	
THEODOLITE SURVEY: Theodolite and types, Fundamental axes and their relationship,	
parts of Vernier transit theodolite, uses of theodolite, Temporary adjustments, measurement	8 Hours
of horizontal angles (Repetition and Reiteration methods) and vertical angles.	0 110015
TRIGONOMETRIC LEVELLING: Determination of Heights and Distances of an	
accessible and Inaccessible object by single plane and double plane methods, Numerical	
problems.	
Module-5 CURVES:	
SIMPLE CURVES: Types, Elements, Designation of curves, setting out of simple curves	0.11
by linear methods (numerical problems on offsets from long chord & chord produced	8 Hours
method), Setting out curves by Rankine's deflection angle method (No derivation), Numerical	
problems.	
<b>COMPOUND CURVES:</b> Elements, Design of compound curves, Setting out of compound	
curves, numerical problems (Case - 1 only).	
<b>REVERSE CURVE:</b> Between two Parallel straights (numerical problems on Equal radius	
and unequal radius).

#### baLake Kannada Text Book for VTU

(Common to B.Arch, B.Plan and B.E/B.Tech of all branches)

[As per Outcome Based Education (OBE) and Choice Based Credit System (CBCS) scheme]

#### **Course Learning Objectives:**

The course will enable the non Kannadiga students to understand, speak, read and write Kannada language and communicate (converse) in Kannada language in their daily life with kannada speakers.

#### **Table of Contents**

Introduction to the Book

Necessity of learning a local langauge:

Tips to learn the language with easy methods.

Easy learning of a Kannada Language: A few tips

Hints for correct and polite conservation

Instructions to Teachers for Listening and Speaking Activities

Key to Transcription

Instructions to Teachers

#### Part - I Lessons to teach and Learn Kannada Language

Lesson – 1 ವೈಯಕ್ತಿಕ, ಸ್ವಾಮ್ಯಸೂಚಕ/ಸಂಬಂಧಿತ ಸಾರ್ವನಾಮಗಳು ಮತ್ತು ಪ್ರಶ್ನಾರ್ಥಕ ಪದಗಳು - Personal Pronouns, Possessive Forms, Interrogative words Lesson – 2 ನಾಮಪದಗಳ ಸಂಬಂಧಾರ್ಥಕ ರೂಪಗಳು, ಸಂದೇಹಾಸ್ಪದ ಪ್ರಶ್ನೆಗಳು ಮತ್ತು ಸಂಬಂಧವಾಚಕ ನಾಮಪದಗಳು - Possessive forms of nouns, dubitive question and Relative nouns Lesson – 3 ಗುಣ, ಪರಿಮಾಣ ಮತ್ತು ವರ್ಣಬಣ್ಣ ವಿಶೇಷಣಗಳು, ಸಂಖ್ಯಾವಾಚಕಗಳು Qualitative, Quantitative and Colour Adjectives, Numerals Lesson – 4 ಕಾರಕ ರೂಪಗಳು ಮತ್ತು ವಿಭಕ್ತಿ ಪ್ರತ್ಯಯಗಳು – ಸಪ್ತಮಿ ವಿಭಕ್ತಿ ಪ್ರತ್ಯಯ – (ಆ, ಅದು, ಅವು, ಅಲ್ಲಿ) Predictive Forms, Locative Case

Lesson – 5 ಚತುರ್ಥಿ ವಿಭಕ್ತಿ ಪ್ರತ್ಯಯದ ಬಳಕೆ ಮತ್ತು ಸಂಖ್ಯಾವಾಚಕಗಳು – Dative Cases, and Numerals

Lesson – 6 ಸಂಖ್ಯಾಗುಣವಾಚಕಗಳು ಮತ್ತು ಬಹುವಚನ ನಾಮರೂಪಗಳು - Ordinal numerals

and Plural markers

	and Plural markers
Lesson – 7	ನ್ಯೂನ / ನಿಷೇಧಾರ್ಥಕ ಕ್ರಿಯಾಪದಗಳು ಮತ್ತು ವರ್ಣ ಗುಣವಾಚಕಗಳು
	Defective / Negative Verbs and Colour Adjectives
Lesson – 8	ಅಪ್ಪಣೆ / ಒಪ್ಪಿಗೆ, ನಿರ್ದೇಶನ, ಪ್ರೋತ್ಸಾಹ ಮತು ಒತ್ತಾಯ ಆರ್ಥರೂಪ
	ಪದಗಳು ಮತ್ತು ವಾಕ್ಯಗಳು - Permission, Commands, encouraging
	and Urging words (Imperative words and sentences)
Lesson – 9	ಸಾಮಾನ್ಯ ಸಂಭಾಷಣೆಗಳಲ್ಲಿ ದ್ವಿತೀಯ ವಿಭಕ್ತಿ ಪ್ರತ್ಯಯಗಳು ಮತ್ತು
	ಸಂಭವನೀಯ ಪ್ರಕಾರಗಳು
	Accusative Cases and Potential Forms used in General Communication
Lesson – 10	"ಇರು ಮತ್ತು ಇರಲ್ಲ." ಸಹಾಯಕ ಕ್ರಿಯಾಪದಗಳು, ಸಂಭಾವ್ಯಸೂಚಕ ಮತ್ತು
	ನಿಷೇಧಾರ್ಥಕ ಕ್ರಿಯಾ ಪದಗಳು
	Helping Verbs "iru and iralla", Corresponding Future and
	Negation Verbs
Lesson – 11	ಹೋಲಿಕೆ (ತರತಮ), ಸಂಬಂಧ ಸೂಚಕ ಮತ್ತು ವಸ್ತು ಸೂಚಕ
	ಪ್ರತ್ಯಯಗಳು ಮತ್ತು ನಿಷೇಧಾರ್ಥಕ ಪದಗಳ ಬಳಕೆ Comparisive Deletionship Identification and Negation Words
	Comparitive, Relationship, Identification and Negation Words
Lesson – 12	ಕಾಲ ಮತ್ತು ಸಮಯದ ಹಾಗೂ ಕ್ರಿಯಾಪದಗಳ ವಿವಿಧ ಪ್ರಕಾರಗಳು
	Different types of forms of Tense, Time and Verbs
Lesson – 13	ದ್, -ತ್, - ತು, - ಇತು, - ಆಗಿ, - ಅಲ್ಲ, - ಗ್, -ಕ್, ಇದೆ, ಕ್ರಿಯಾ
	ಪ್ರತ್ಯಯಗಳೊಂದಿಗೆ ಭೂತ, ಭವಿಷ್ಯತ್ ಮತ್ತು ವರ್ತಮಾನ ಕಾಲ ವಾಕ್ಯ ರಚನೆ
	Formation of Past, Future and Present Tense Sentences with Verb Forms
14	
Lesson – 14	ಕರ್ನಾಟಕ ರಾಜ್ಯ ಮತ್ತು ರಾಜ್ಯದ ಬಗ್ಗೆ ಕುರಿತಾದ ಇತರೆ ಮಾಹಿತಿಗಳು
	Karnataka State and General Information about the State
Lesson – 15	ಕನ್ನಡ ಭಾಷೆ ಮತ್ತು ಸಾಹಿತ್ಯ -
	Kannada Language and Literature
Lesson – 16	ಭಾಷೆ ಕಲಿಯಲು ಏನನ್ನುಮಾಡಬೇಕು ಮತ್ತು ಮಾಡಬಾರದು
_	Do's and Don'ts in Learning a Language
Lesson – 17	DADT H
Lesson – 17	FART - II Kannada Language Script Part – 1
	Mannava Danguage Script Lart - 1
Lesson – 18	PART - III
	Kannada Vocabulary List : ಸಂಭಾಷಣೆಯಲ್ಲಿ ದಿನೋಪಯೋಗಿ ಕನ್ನಡ
	ಪದಗಳು - Kannada Words in Conversation
Lesson – 18	PART - III Kannada Vocabulary List : ಸಂಭಾಷಣೆಯಲ್ಲಿ ದಿನೋಪಯೋಗಿ ಕನ್ನಡ

Course Title: Abili	ty enhancement course (AutoO	CAD Software)		
Course Code 21CVAE36A Credi				
Jumber of Practical Hours/Week         2 Hrs.Practical         SEE				
Total Number of Practical Hours: 28   CIE: 50   SEE Ho				
Prerequisite: none				
Course objectives:				
To enable the student to acquire the	knowledge in the following topi	cs		
1. Understand the concept of AutoC	CAD and application.			
2. Create various types of building	plans, Elevations etc.			
3. Create centre line diagrams for v	various types of building plans.			
4. Create Line diagram for various	services in a building.			
Modules			Teaching	
	Module 1		Hours	
Introduction to AutoCad, Usage of Aut polyline, trim, extend, copy, mirror, rota text, layers, coordinate system, import a compatibility	ate, erase, offset, move, array, sca	ale, fillet, explode,	02hours	
]	Module III			
Development of plan, elevation and sec	tion elevation for		06 hours	
1. One storey residential bui	lding			
2. Two storeyed residential	building			
	Module III			
Centre line diagram for Primary school building, Primary health centre and foundation				
center line diagram for load bearing and	RCC structures in AutoCAD so	oftware	04 hours	
	Module IV			
Line diagram for preparation of water su narvesting	pply, sanitary, electrical layouts	and rain water	02 hours	

Text Book: A	utoCAE	) User Manual	
Course outco			
On completio	n of the	e course, the student will have the ability to:	
Course Code	CO#	Course Outcomes	Blooms Level
	CO1	Understand the concept of AutoCAD and application.	
	CO2	Create various types of building plans, Elevations etc.	
21CVA36A	CO3	Create centre line diagrams for various types of building plans.	
	C04	Create Elevations for various types of building plans.	
	CO5	Create Line diagram for various services in a building.	

<b>Course Code</b>	21UHV36B	Credits:1	CIE: 50

ensure sustained happiness and prosperity, which are the core aspirations of all human beings.

- 2. To facilitate the development of a Holistic perspective among students towards life and profession as well as towards happiness and prosperity based on a correct understanding of the Human reality and the rest of Existence. Such a holistic perspective forms the basis of Universal Human Values and movement towards value-based living in a natural way.
- 3. To highlight plausible implications of such a Holistic understanding in terms of ethical human conduct, trustful and mutually fulfilling human behaviour and mutually enriching interaction with Nature.

Modules	Teaching
	Hours
Module I	
Introduction To Value Education: Understanding Value Education, Need Of Value Education,	
Basic Guidelines For Value Education, The Content Of Value Education, The Process Of Value	
Education.	3hrs
Self- Exploration As The Process For Value Education: Starting To Observe Inside, What Is	
Self-Exploration? What Is Its Purpose?, Content Of Self-Exploration, Natural Acceptance, What	
Is The State Today?, What Is The Way Out? What Do We Need To Do?.	
Module II	
The Basic Human Aspirations- Continuous Happiness And Prosperity: Continuous Happiness	
And Prosperity- Our Basic Aspiration, Exploring Happiness And Prosperity, A Look At The	
Prevailing Notions Of Happiness And Prosperity, Some Possible Questions/ Confusions.	3hrs
The Program To Fulfill Basic Aspiration: Basic Requirements For Fulfillment Of Human	
Aspirations, What Is Our State Today?, Why Are We In This State?- Living With Wrong	
Assumptions, What Is The Solution?- The Need For Right Understanding, Our Program:	
Understand And Live In Harmony At All Levels Of Living, Our State Today?, Our Natural	
Acceptance For Harmony At All Levels Of Our Living, Human And Animal Consciousness.	

#### **Module III**

**Understanding The Harmony At Various Levels:** Understanding The Human Being As Co-Existence Of Self(I) And Body, Human Being Is More Than Just The Body, Understanding Myself As Coexistence Of Self And The Body, Understanding The Needs Of The Self And Needs Of The Body, Understanding The Self(I) As A Conscious Entity, The Body As The Material Entity, Exercise On Distinguishing Needs Of The Self(I) And The Body, Exercise On Distinguishing Activities Of The Self(I) And Body, Understanding The Body As An Instrument Of 'I'(I Being The Seer, Doer And Enjoyer).

**Harmony In Self(I)- Understanding Myself:** Why Should I Study Myself?, Getting To Know The Activities In I Related?, The Activities In I Are Continuous, What Is The Problem Today?, Effects Of The Problem, What Then Is The Solution?, Result Of Realization And Understanding-Living With Definiteness.

Harmony With The Body- Understanding *Sanyama* And*Svashtya*: Our Body- A Self-Orgnaised Unit, Harmony Of I With The Body: *Sanyama*And *Svashtya*, What Is Our State Today?, What Is The Way Out?, Understanding And Living With Sanyama, Correct Appraisal Of Our Physical Needs.

#### Module IV

**Harmony In The Family- Understanding Values In Human Relationships:** Family As The Basic Unit Of Human Interaction, Harmony In The Family, Justice(*Nyaya*), What Is The State Today?, Values In Human Relationships, Trust(*Visvasa*),Respect(*Sammana*), The Basis For Respect, Assumed Bases For Respect Today, The Problem Due To Differentiation, Difference Between Attention And Respect, What Is The Way Out?, Affection (*Sneha*), Care(*Mamata*), Guidance(*Vatsalya*),Reverence(*Shraddha*),Glory(*Gaurava*),Gratitude(*Kritagyata*),Love(*Prema*), Harmony From Family To World Family: Undivided Society.

Harmony In The Society-From Family Order To World Family Order: Extending Relationship From Family To Society, Identification Of The Comprehensive Human Goal, Where Are We Today?, Programs Needed To Achieve The Comprehensive Human Goal: Five Dimensions Of Human Endeavour, Education-Right Living (*Siksha-Sanskara*), Health-Self-Regulation (*Svasthya-Sanyama*), Justice-Preservation (Nyaya-Suraksha), Production-Work (*Utpadana-Karya*), Exchange-Stotage (*Vinimaya-Kosa*), What Is Our State Today?, Harmony From Family Order To World Family Order: Universal Human Order.

 Module V
 2hrs

 Harmony In Nature-Understanding The Interconnectedness And Mutual Fulfillment: The
 2hrs

3hrs

3hrs

Four Orders Of Nature, Incconnectedness And Mutual Fulfillment (Parasparta And Paraspara Purakata), Recyclability And Self-Regulation In Nature, Understanding The Four Orders- Things (Vastu), Activity(Kriya), Innateness(Dharana), Natural Characteristic(Svabhava), Basic Activity, Conformance(Anu-Sangita), Human Beings-Our State Today, What Is The Way Out?.

**Harmony In Existence-Understanding Existence As Co-Existence**: An Introduction To Space (Sunya), Co-Existence Of Units In Space, Limited And Unlimited, Active And No-Activity, Energised And Energy In Equilibrium, Each Unit Recognizes.... Space Is Reflecting Or Transparent, Self-Organised And Self-Organisation Is Available, Existence Is Co-Existence, What Are We Doing Today?, Where Do We Want To Be?

#### **Text Books:**

- 1. The Text Book R.R Gaur, R Sangal, G P Bagaria, A Foundation Course In Human Values And Professional Ethics, Excel Books, New Delhi, 2010, ISBN 978-8-174-46781-2.
- 2. The teacher's manual R.R Gaur, R Sangal, G P Bagaria, A foundation course in Human Values and professional Ethics Teachers Manual, Excel books, New Delhi, 2010

#### **Reference Books:**

#### Course outcomes: On completion of the course, the student will have the ability to:

Course Code	CO	Course Outcome (CO)
	CO1	The students are able to see that verification on the basis of natural acceptance and
		experiential validation through living is the only way to verify right or wrong, and

		referring to any external source like text or instrument or any other person cannot
21UHV36B		enable them to verify with authenticity; it will only develop assumptions
	CO2	The students are able to see that their practice in living is not in harmony with their
		natural acceptance most of the time, and all they need to do is to refer to their
		natural acceptance to remove this disharmony
	CO3	The students are able to see that lack of right understanding leading to lack of
		relationship is the major cause of problems in their family and not the lack of
		physical facilities in most of the cases, while they have given higher priority to
		earning of physical facilities in their life ignoring relationships and not being aware
		that right understanding is the most important requirement for any human being
	CO4 The students feel confident that they can understand the whole existen	
		is a mystery in this existence. They are also able to see the interconnectedness in
		the nature, and point out how different courses of study relate to the different units
		and levels. Also, they are able to make out how these courses can be made
		appropriate and holistic.
	CO5	The students are able to grasp the right utilization of their knowledge in their
		streams of Technology/Engineering/ Management to ensure mutually enriching
		and recyclable productions systems.
	CO6	The students are able to sincerely evaluate the course and share with their friends.
		They are also able to suggest measures to make the course more effective and
		relevant. They are also able to make use of their understanding in the course for a
		happy and prosperous society.

Course Title: BUI	LDING PLANNING AND	DRAWING	
Course Code	21CVL33	CRI	EDIT:02
Number of Lecture	1 Hours (Lectures)	CE	EE: 50
Hours/Week	2 Hours (Practical)	51	2E. 30
Total Number of Lecture Hours:28	CIE: 50	SEE:	04 Hours
Prerequisite: none			
Course objectives:			
To enable the student to acquire the kno	wledge in the following topics		
			<b>Teaching Hour</b>
PART-I			
To prepare working drawing of compo	nent of buildings i) Stepped wa	all footing and	
isolated RCC column footing, ii) Fully	paneled and flush doors, iii) Hal	f panelled and	3 Hrs
half-glazed window. iv) symbols used in civil engineering drawing, types of masonry			
bonds			
Functional design of building (Resid	ential, Public and Industrial),	positioning of	
various components of buildings, orientation of buildings, building standards, bye laws,			4 Hrs
set back distances and calculation of car	pet area, plinth area and floor ar	ea ratio.	
Functional design of building using in	nter connectivity diagrams (bul	oble diagram),	
development of line diagram only for following building:			6 Hrs
i) Residential building ii) Primary health center, iii) Primary school building			
For a given single line diagram, prepar	ration of water supply, Sanitary	and electrical	
layouts. Rain water harvesting elements			4 Hrs
PART-II			
Development of plan, elevation, section	n and schedule of openings from	the given line	1 Hrs
diagram of residential buildings, i) Two	bed room Residential building,	ii) Two storied	
building.			10 Hrs
Question paper pattern:			
Part-I: one question of 30 marks			
Part-II. Two questions of 10 marks each	L		
Text books:

### **Course outcomes:**

## On completion of the course, the student will have the ability to:

Course	CO #	Course Outcome (CO)
Code		
	CO1	Understand the concepts of Principles of Planning and theory course through series of
		Drawings.
	CO2	Share the responsibilities in small teams of 4-5 members for planning and drawing.
21CVL33	CO3	Perform the drawings with logic and application of principles
	CO4	Suitable dimensions as per standard data and interpreted the Drawings.
	CO5	Prepare set of Drawings relevant to the Course.

## **IV Semester**

Co	urse Title STRUCTURAL ANALYSIS	
Course Code	21CV41 Credit:	04
Number of Lecture Hours/Week	umber of Lecture Hours/Week     3 Hours (Theory)     SEE: 50 N	
Total Number of Lecture :42 Hrs	CIE: 50 Marks SEE: 03	Hours
Prerequisite: Engineering Mechanic	cs, Strength of material	
Course objectives:		
To enable the student to acquire the	he knowledge in the following topics	
1. Determine the degree of freedom	m and degree of redundancy of structures and analyse t	he trusses
2. Analysis beams, frames& trusse	es for displacements using strain energy methods.	
3. Analysis arches, cables and ana	lysis of beams by slope deflection method	
4. Analysis of beams and frames b	by moment distribution method	
5. Analysis of beams and frames b	by Kani's method.	
Modules		
		Hours

On com		the course, the student will have the ability to:	
Course Code	CO#	CourseOutcome(CO)	
	CO1     Describe different types of structural systems and analyze plane trusses		
	CO2	Analyze the beams, trusses and frames using energy principles and Analyze the arches and cables	
21CV41	CO3	Analyze frames and beams by slope deflection method	
	CO4	Analyze beams & frames by moment distribution method	
	CO5	Analyze beams & frames by Kani's method. Analyze beams subjected to rolling loads	

Course Title	CONCRETE TECHNOL	LOGY	
Course Code	21CV42	Credit: 02	
Number of Lecture/weeks	2 Hrs (Theory)	SEE:50 Marks	
Total Number of LectureHours: 28	CIE:50 Marks	SEE: 03 Hours	
Prerequisite: none			
Course objectives:			
To enable the student to acquire the kno	wledge in the following top	ics	
1. Hydration of cement and physical prop	perties of cement and types of	f cement.	
2. Physical properties of course and fine a	aggregate.		
3. Design of concrete mix.			
4. Fresh and hardened state property of co	oncrete.		
5. Testing of concrete.			
-	Modules		Teaching
			Hours
Module I			
Cement: Manufacture of cement (OPC) by	y dry and wet process (Flow	charts only). chemical	5 hours
composition and their importance, bogue's	compounds, hydration of cen	nent, heat of hydration.	
Tests on cement- Fineness by sieve test and	d Blaine's air permeability te	st, normal consistency,	
setting time, soundness, compressive stren	gth of cement specific gravit	y of cement	
Ν	Aodule-II		
Aggregate: Coarse aggregate, importance	of size, shape, texture, gradin	ng of aggregates, sieve	5 hours
analysis Flakiness and Elongation, Speci	fic Gravity, Moisture Conte	ent, Crushing ,Impact,	
Abrasion tests.Fine Aggregate, Bulking of	fine aggregate, Bulk Density	, Ten percent Fineness	
Value, Sieve Analysis Specific Gravity. De	eleterious Material and Introd	duction of M sand.	
Μ	lodule -III		
Fresh Concrete: Workability-factors at	ffecting, measurement of	Workability-Slump,	6 hours
Compaction Factor, Vee-bee Consistomete	er, Flowtests. Segregation an	d Bleeding, Mixing,	
Placing and Compaction.			
Curing methods, Accelerated curing.			
Admixtures-plasticizer, superplasticizer,	accelerators, retarders and	airentraining agents.	

Module IV	
Hardened Concrete: Factors affecting strength- w/c, degree of compaction, age,	
aggregate/cement ratio, aggregate properties, maturity concept. Elasticity, factors affecting	
modulus of elasticity, relation between modulus of elasticity and Poisson's ratio, Introduction	6 hours
to RMC. Testing: Destructive testing-compressive strength, flexural strength, splittensile	
strength NDT by Schmidt rebound hammer test. Relation between tensile strength and	
compressive strength	
Module V	6 hours
Shrinkage- types of shrinkage, factors affecting shrinkage. Creep- factorsaffecting creep, effec	t
of creep. Durability-importance, permeability, sulphate attack, chloride attack, carbonation	,
freezing and thawing.	
Concrete Mix Design: Factors to be considered in Mix Design, Mix Design by IS method.	
Question paper pattern:	
Two questions to be set from each Module by intermixing (in total 10). Studentshave to an	swer any five
full questions by selecting one question from each module.	
Textbooks:

www.civilenggebooks.com	
Course outcomes:	
On completion of the course, the student will have the ability to:	

Course	CO #	Course Outcome (CO)			
Code					
	CO1	Explain manufacturing of cement and the significance of physical properties of cement.			
	CO2       Describe and identify the requirements of goodquality fine aggregate a coarse Aggregate.				
21CV42	V42 CO3 Design a concrete mix and explain the fresh stateproperty requirement of concrete				
CO4 Evaluate the influence of different parameters on the properties of hardened concrete		Evaluate the influence of different parameters on the properties of hardened concrete			
	CO5				

WAT	ER RESOURCES ENGINEER	ING	
Subject code	21CV43	Credit: 0	03
Hours/Week	Iours/Week     3 hours. (Theory)     SEE: 50 Marks		arks
Total hours: 42	Total hours: 42CIE: 50 MarksSEE: 3 ho		urs
Prerequisite: Fluid Mechanics, Eng	gineering Mathematics		
Course objectives:			
to enable the student to acquire the ki	nowledge in the following topics		
1. Introduce importance of water res	ource engineering		
2. Making students to understand bas	ics of hydrology & Hydrograph		
3. Introduce problems involved in ca	nal irrigation system.		
4. Design of Gravity Dams, earthen	Dams and spillways		
	Modules		Teaching Hours
	Module I		
Introduction: water resources engin	neering disciplines, water manage	ement sectors Water	8 Hours
wealth of India. Hydrological cycle, water shed hydrology, measurement of precipitation by			
rain gauges Computation of precipita	tion, missing rainfall data, rain ga	uge density, rainfall	
mass curve & hyetograph - Problems	s on above.		
	Module-II		
Runoff: Runoff cycle, factors affe	cting runoff, computation of ave	erage annual runoff,	
maximum runoff, Concept of Hydrog	graph & Unit Hydrograph & Flood	l frequency Studies -	8 Hours
problems.			
Reservoirs: Types, site selection, In	nvestigations for reservoirs. Deter	rmination of storage	
capacity of reservoirs using mass c	surve, analytical method, storage	zones of reservoir,	
economical height of dam.			
	Module-III		

<b>Canal</b> i	irrigation: Types of canals, alignment of canals, definition of gross command area,			
	ble command area, intensity of irrigation, time factor, capacity factor, kharif season,	10 Hours		
rabi season, types of crops & their duty, delta, base periods determination of canal capacity,				
frequen	cy of irrigation, field capacity. Crop factor. Consumptive use of water, Blinney-			
criddle	equation problems irrigation efficiency, L-section of canal, balancing depth of canal			
	Module –IV			
Types of	of Dams & Spillways: Rigid dams & non-rigid dams Gravity dams, Forces acting on			
gravity	dams, design of elementary profile of gravity dam, Types of Spillways, Necessity,	8 Hours		
location	n, ogee spillway. Design of ogee spillway, Energy dissipation below spillway. Use of			
hydraul	ic jump & design of stilling basin			
	Module-V			
Earthe	n dams: Types, Necessity, mode of failures of earth dams, Preliminary section,			
design of earth dam, determination of Phreatic line in earth dams, seepage discharge and				
problen	ns, Control of seepage in earth dams. Design criteria of earth dams, Seepage Analysis			
& stabi	lity Analysis of earthen dams- Fellenious method & Swedish Slip circle method,			
Course	Outcomes: On completion of this course, students are able to:			
CO	Course Outcomes	Blooms Level		
CO1:	Explain water management sectors and importance of water resource projects	C2		
CO2:	Describe hydrological cycles and various components	C2		
CO3:	Assess requirements of canal irrigation and gain knowledge about spillways and energy dissipating systems	C2		
CO4	Design Spillways and Dams	C5		
CO5	Design earthen dam	C5		
Questio	on paper pattern:	1		
~ .				

Scheme of SEE: i) Two questions are to be set from each module. i) Total five questions are to be answered by selecting minimum one question from each module.

Number of Lecture Hours/Week	3 Hrs (Theory)	SEE: 50		
Total Hours: 42	Total Hours: 42 CIE: 50 SEE: 03 Hours			
Prerequisite: None				
Course objectives:				
To enable the student to acquire the	e knowledge in the following top	pics		
1. Properties and preservation for sto	one and timber.			
2. Properties of bricks and bonds in	orick work			
3. Types of stone masonry, materials	and methods of damp proofing c	courses.		
4. Types of stairs and design of dog	legged stair.			
5. Roof, insulating materials and typ	es of plastering.			
6. Types of doors, windows, flooring	g and paints,			
7. Plumbing and electrical materials	and works.			
	Modules		Teaching	
	•		Hours	
Module Dilli Citati			8 hours	
Building Stones: Common building stones and their uses, quarrying of stones, qualities of				
good building stones, deterioration of	stones, Preservation of stones, dr	essing of stones, tests		
on building stones.				
Timber: Important varieties and uses, defects in timber, tests for good timber, seasoning of				
timber, ply wood and its uses.				
	Module-II		7 hours	
Bricks & Brick Masonry: Classification and composition of bricks, qualities of good bricks,			/ 110015	
tests on bricks. Definition of terms u	used in masonry, bonds in brick	work, English bond,		
Flemish bond, Reinforced brick work	, Sand lime brick.			
Stone Masonry: Rubble Masonry,	Coursed and Un-coursed rubb	ole masonry, Ashlar		

Module III	
Damp Proof Course: Materials used for damp proof course, D.P.C Treatment in building	5hours
nethods of treatment to foundations, treatment to floors, walls and slabs, Concrete paver	
locks.	3hours
Stairs: Types (classifications) and technical terms in stairs, requirements of a good stair,	
geometric design of R.C.C dog legged and open well stairs (Plan and Sectional elevation of	
stairs).	
Module IV	
Doors: Types, Paneled doors, glazed doors, flush doors.	5hours
Windows: Types, Paneled Window, glazed Window, UPVC Windows, .	
Floors: Types of flooring (materials and methods of laying), Granolithic, mosaic, ceramic,	
marble and polished granite, Linoleum.	4hours
Plastering & Painting: Purpose of plastering, materials of plastering, lime mortar, cement	
mortar, masonry mortar, methods of plastering, Stucco plastering, Lath plastering.	
Purpose of painting, types of paints, application of paints to new and old surfaces, distemper,	
plastic emulsion, enamel, polishing of wood surface.	
	2.1
Roofs & Miscellaneous Materials: Sloped roof (R.C.C and tile roof), Requirements of good	3 hours
roofs, Adhesives, Asbestos, Thermopolis, Fibers, Heat insulating materials, Sound insulating	
materials, Geosynthetics. Partition walls (Gypsum sheets etc), other advanced building	
materials.	4 hours
Plumbing: Pipework, Pipe fittings – couplings and connections, Range of fittings, Valves	
and cocks Services generally, Hot and cold-water services, Soil and ventilation stacks,	
Overflows, Water supply from the main, Equipment, Cold water storage cisterns, Hot water	
storage cylinders, Feed and expansion tanks, Central heating, Piping for central heating	
systems, Emitters, Appliances, Waste disposal piping and systems, Insulation, Corrosion,	3 hours
Air locking and water hammer, First fixings.	
Electrical: Power generation, wiring installation types, Sub-mains and consumer, control	
units, Sub-circuits, Work stages, Electrician's roughing, Earth bonding, Final fix, Testing	
and certification, more on protective devices, Wiring diagrams, Accessories	
Question paper pattern:	
Two questions to be set from each Module by intermixing (in total 10). Students have to answe	er any five f
questions by selecting one question from each module.

CONSTITUTION OF INDIA AND PROFESSIONAL ETHICS			
Course Code	21HU45	CREDIT: 01	
Number of Lecture Hours/Week	2Hrs (Theory)	SEE: 50	
Total Hours: 28	CIE: 50	SEE: 03 Hours	

#### **Course Objectives :**

To enable the students to obtain the basic knowledge about The Constitution of India and Professional Ethics in the following topics:-

- . Introduction and Fundamental Rights
- . Directive Principles of the State Policy and the State Executive
- . The Union Executive
- . Constitutional Provisions for women, Children & SC/ST 'S , Emergency Provisions and Election Process
- . Engineering Ethics

### MODULE – I

**Introduction and Fundamental Rights** : The Constitution of India. Evolution of the Constitution. The Constituent Assembly of India. Sources and Features of the Indian Constitution. Preamble to the Constitution of India. Salient Features of Fundamental Rights and their classification. General exercise of Fundamental Rights and their limitations. RTI (Right to Information Act of 2005 Under Article 19(1)) and The Right of Children to Free and Compulsory Education Act or Right to Education Act (RTE) Under Article 21-A of the Constitution. Article 371(J) of the Constitution applicable to Hyderabad Karnataka Area.

6 hrs.

#### **MODULE – II**

**Directive Principles of the State Policy and The State Executive**: Under Article 36 to 51 of The Constitution and their Relevance. Fundamental Duties Under Article 51A of The Constitution and their Relevance. State Government - The Governor- Appointment, Powers and Functions of the Governor. The Appointment of Chief Minster, his Powers and Functions. The State Council of Ministers and their Functions. The State legislature and The State Council. The High Court of the State, its Powers and Jurisdiction. Appointment and Qualifications of High Court Judges. 6 hrs.

#### **MODULE – III**

The Union Executive: Central Government. The President of India, his Election, Powers and Functions. The Vice-President of India, his Election, Powers and Functions. The Supreme Court of India and its Structure. Appointment and Qualification of Supreme Court Judges. Their Powers and Functions. The Structure of Judiciary in India. The Parliament of India. The Prime Minister, his Appointment, Powers and Functions. The Union Council of Ministers their Powers and Responsibilities. Concept of Public Interest Litigation (PIL) **6 hrs.** 

#### **MODULE – IV**

**Constitutional Provisions and Emergency Provisions and Election Process** : Constitutional for Women, Children, Backward Classes and Scheduled Caste and Scheduled Tribes under different Article of The Constitution. Different types of Emergencies under Article 352, 356 and 360 of the Constitution of India. The Election Commission of India- its Powers and Functions. The State Election Commission

5 hrs.

#### **MODULE – V**

**Engineering Ethics:** Its Aims and Scope, Responsibilities of Engineers, Impediments to their Responsibilities, Honesty, Integrity, Reliability, Risk and Safety Measures, Liabilities of Engineers.**5 hrs.** 

Course Outcomes: At the end of the course the students will be able to

CO 1	Explain the evolution and features of constitution, fundamental rights and their classification L 2
CO 2	Describe the directive principles of state policy, fundamental duties and The State Executive L 2
CO 3	Describe about The Union Executive and concept of Public Interest Litigation L 2
CO 4	Explain the Constitutional Provisions for women, children, SC/ST'S, Emergency Provisions and Election Process L 2
CO 5	Identifies the qualities required for an professional engineers to be ethical L 4

 Course outcomes: On completion of the course, the student will have the ability to:

 Course
 CO
 Course Outcome (CO)

 Code
 CO1
 The students are able to visualize the co-relation between lack of human values and the prevailing problems.

 CO2
 They are also able to visualize tangible steps and a roadmap for moving in the cherished direction.

 21UHV46
 CO3
 The students are able to visualize an appropriate utilization of the knowledge in their respective streams to ensure mutually enriching and sustainable systems.

<b>CO4</b>	The students are able to sincerely evaluate the course and the transformation achieved in
	this process.
CO5	They are also able to make use of this understanding for moving towards happy and
	prosperous life including an ethical conduct of their profession.

Course Title: E	NGINEERING GEOLOGY LABORATORY		
Course Code	Course Code 21CVL41 CREDIT CIE:		
Number of Lecture Hours/Week	SEE: 50		
Total Number of Lecture Hours14/28 HoursSEE: 03 T			
Prerequisite: none			
Course objectives:			
This laboratory course will enable stu	dents to		
1: Understand the various physical pr	operties of minerals, and they can identify differ	ent types of Mineral	
2: Understand the various physical pr	operties of the rocks, and they can classify diffe	rent types of rocks.	
3: Understand the various structural f	eatures of the earth.		
		Teaching Hours	
1. Physical properties of minerals: Identification of			
I. ROCK FORMING MINERALS -	Quartz group, Feldspar group, Garnet group, N	Mica 2 Hrs	
group & Talc, Chlorite, Olivine, Asbestos, Calcite, Gypsum, etc			
II. ORE FORMING MINERALS-	Magnetite, Hematite, Pyrite, Pyralusite, Grap	hite, 2 Hrs	
Chromite, etc		2 1115	
2. Engineering Properties of Rocks: I	dentification of	2 Hrs	
I. IGNEOUS ROCKS- Types of	Granites, Dolerite, Granite Porphyry, Basalt, Pur	nice	
etc			
II. SEDIMENTARY ROCKS- San	ndstone, Lime stone, Shale, Laterite, Breccia etc	1 Hrs	
III. METAMORPHIC ROCKS- Gneiss, Slate, Schist, Marble, Quartzite etc			
3 Dip and Strike problems. Determine	nation of Apparent dip and True dip.		
5. Calculation of Vertical, True thickn	ness and width of the outcrops.	2 Hrs	
6. Three-point borehole problems.			
7. Interpretation and drawing of section	ons for geological maps showing tilted beds, faul	ts, 1 Hrs	
unconformities etc.			
8. Interpretation and drawing the GEO	DLOGICAL SECTION MAPS.		
9. Field work- To identify Minerals,	Rocks, Geomorphology and Structural features	with

## Hyderabad Karnataka Education Society's Poojya Doddappa Appa College of Engineering

(An Autonomous Institution &Affiliated to Visvesvaraya Technological University, Belagavi) Aiwan E-Shahi Area KALABURAGI 585 102 Karnataka India

## CURRICULUM

## FOR B.E.V SEMESTER AND VI SEMESTER

FOR THE ACADEMIC YEAR 2023-24

DEPARTMENT OF CIVIL ENGINEERING

Page 1 of 51

#### **About College:**

Poojya Doddappa Appa College of Engineering (PDACE) is the first institution of Hyderabad Karnataka Education (HKE) Society, Kalaburagi, which was established in the year 1958. The foundation stone of this college was laid by the then Vice President of India Dr.Sarvapalli Radhakrishnan in 1958.

At present, PDA College of Engineering is offering 11 UG programs, 10 PG Programs and 12 Research centers, spreading and imparting technical education in North Karnataka Region. The college has state of the art laboratories, digitalized smart class rooms having highly qualified and experienced faculty with highest no. of Ph.D. and M. Tech degrees.

PDACE is the only Autonomous Institution in the region, which was sponsored under TEQIP I , TEQIP-II and TEQIP-III from World Bank and received grants of Rs.10.43 crores, Rs. 17.5 crores and 7 crores respectively. This is one among 12 institutions having TEQIP-I and TEQIP -II sponsorship. At present, college is selected in TEQIP-III as Mentor Institution for Bundelkhand Institute of Engineering & Technology, Jhansi.

The Vision and Mission of PDA College of Engineering are as mentioned below.

## VISION

• To be an institute of excellence in technical education and research to serve the needs of the industry and society at local and global levels.

## MISSION

- To provide a high-quality educational experience for students with values and ethics that enables them to become leaders in their chosen professions.
- To explore, create and develop innovations in engineering and science through research and development activities.
- To provide beneficial service to the national and multinational industries and communities through educational, technical and professional activities.

#### **About Department of Civil Engineering**

The Civil Engineering Department was established in the year 1958 with an intake of 60 students. In 1994 the intake was increased to 90 and further increased to 180 in the year 2014.Presentlythe department runs both UG and PG (Environmental Engineering and Structural Engineering) programs with intake of 180 in UG program and 18 in each PG program. Department is recognized as Research Centre by Visvesvaraya Technological University Belagavi in the year 2002 and at present 35 research scholars are pursuing their Ph.D. and seven research scholars have been awarded with Ph D degree.

The Department has signed MoU with various industries like Medini, Sharan Technical consultancy, Canter Technologies Pvt. Ltd, Sharan Chandra Consultant, JGD Consultants, Jalavahini Management Services Pvt. Ltd. Dharwad, Shah Technical Consultants Pvt. Ltd., PP Raju & Co., Design Consortium, KRIDL, Bharath Dal and Oil Industries, Ultratech, ACC, Alstom, Karnataka State Pollution Control Board & HCC. These MoUs have helped the students in getting exposure to industrial environment and also for conducting Industry Institute Interaction events.

The Vision, Mission and Program educational objectives of Civil Engineering Department are as follows:

#### VISION

• To be the preeminent department for imparting technical knowledge and skills in the Civil Engineering field to meet the social, industrial, environmental and research needs at local and global levels.

#### MISSION

- To provide technical education to meet the challenges in the profession through a wellstructured curriculum.
- To inculcate innovation and research ideas for sustainable development with ethical background.
- To impart entrepreneurial skills for serving the needs of the society through technical and professional activities.
- To create Civil Engineering professionals to serve the needs of the industry at local and global levels.

#### PROGRAM EDUCATIONAL OBJECTIVES(PEO'S)

Program educational objectives are broad statements that describe the Career and Professional accomplishments that the program is preparing graduates to achieve. The program educational objectives of the B.E. in Civil Engineering Program at PDA College of Engineering, Kalaburagi are:

**PEO1:** To provide the knowledge of mathematics, science and engineering fundamentals for solving civil engineering problems.

**PEO2:** To enable the graduates to exhibit their technical knowledge and skills of recent practices to identify and solve civil engineering problems.

**PEO3:** To enable the graduates to conduct and interpret the results of laboratory/ field experiments in basic sciences, engineering sciences and civil engineering.

PEO4: To enable the graduate for pursuing higher education and lifelong learning.

**PEO5:** To enable the graduates to acquire communication, team work and entrepreneurial skills along with the values of professional ethics.

#### **PROGRAM OUTCOMES**

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

2. Problem analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

Page 4 of 51

6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

#### **PROGRAM SPECIFIC OUTCOMES**

The Civil Engineering graduates are able to:

**PSO1**: Plan, Analyze and Design buildings, Water supply and Sewerage systems, Hydraulic structures and Transportation infrastructure using sustainable materials and conceptual knowledge of Geotechnical engineering.

**PSO2**: Conduct survey and Laboratory experiments/ field investigations and interpret the data for application to real life problems.

**PSO3:** Prepare detailed estimate of civil Engineering works and Execute the civil Engineering Projects with optimum resources using effective communication skills and Professional ethics

Subject code	21CV52	Credit: (	)4
Hours/Week	3 hours. (Theory)	SEE: 3 hours	
Total hours: 42	CIE: 50 Marks	SEE: 50 M	larks
Prerequisite: Water Resources	engineering		
Course objectives: To enable the student to acquire t 1. Fundamentals of water and v	he knowledge in the following to vastewater engineering.	-	
-	r supply and wastewater collection	•	
· ·	assessment of water and wastewa r system using hydraulic principl er treatment systems.		
	Modules		Teaching Hours
	MODULE-I		
<ul> <li>institutional and commercial, pu –factors affecting per capita der with merits and demerits- variati – estimation by Kuching's form underwriters' formula, peak facto periods.</li> <li>Quality of water: Objectives of wholesomeness, palatability and</li> </ul>	mand, population forecasting, d ions in demand of water. Fire der ula, Freeman formula and nation rs, design periods and factors gov water quality management. Conc	a consumption lifferentmethods nand onal board offire erning the design ept of safe water	08 Hours
	MODULE-II		

flow, estimation of storm flow, rational method and empirical formulae of design of storm water drain; Time of concentration. Sewer Appurtenances: Catch basins, manholes, flushing tanks, oil and grease traps, drainage traps, basic principles of house drainage, typical layout plan showing house drainage connections, maintenance of house drainage	
MODULE-III	
Collection and conveyance of water: Intake structures – different types of intakes; factor of selection and location of intakes. Pumps- Necessity, types – power of pumps; factors for the selection of a pump. Pipes – Design of the economical diameter for the rising main; Nomograms – use; Pipe appurtenances. types of sewerage systems and their suitability. Design of Sewers: Hydraulic formulae for velocity, effects of flow variations on velocity, self-cleansing and non-scouring velocities. Design of hydraulic elements for circular sewers flowing full and for partially full. Disposal of effluents: By dilution, self-purification phenomenon, oxygen sag curve, zones of purification, sewage farming, sewage sickness, disposal standards on land	08 Hours
and water, chlorination of sewage.	
<b>Treatment of sewage:</b> Flow diagram of municipal sewage treatment Plant.	
MODULE-IV	
<ul> <li>types of aerators.</li> <li>Sedimentation: Theory of settling tanks, types, design. Aided sedimentation – with coagulants, dosages, chemical feeding, flash mixing, and flocculator-design of all units.</li> <li>Primary Treatment: screening, grit chambers, skimming tanks, primary sedimentation tanks – Designs.</li> </ul>	08 Hours
MODULE-V Filtration: Mechanism – theory of filtration, types of filters, slow sand, rapid sand and pressure filters including construction, operation, cleaning and their design – excluding under drainage system – back washing filters. Softening: Definition, methods of removal of hardness lime soda process and zeolite process. Disinfections: Theory of disinfections, methods of disinfections, Chlorination, chlorine demand, residual chlorine, use of bleaching powder. Secondary Treatment: Trickling filter – types, theory and operation – Designs. Activated sludge process – principle and flow diagram, methods of aeration, modifications, F/M ratio – Design	08 Hours
Course Outcomes: On completion of this course, students are able to:	
Question paper pattern:         i) Two questions are to be set from each module.         ii) Total five questions are to be answered by selecting minimum one question from e         Text books:         1. #### **Reference Books:**

1. Manual on Waste Water Treatment - CPHEEO, Ministry of Urban Development, New Delhi

E-Books: www.civilenggebooks.com

ENVIRONMENTAL ENGG LAB

**Prerequisite:** None

**Course objectives:** 

- 1. To enable the student to acquire the knowledge in the following topics
- 2. Determination of Solids in Water / Sewage, turbidity, electrical conductivity, optimum alum dosage, Sieve Analysis of Filter Sand.
- 3. Determination of Chlorides. Alkalinity, Acidity, Total Hardness, COD, BOD, percentage of chlorine,
- 4. Determination of pH. Sulphate, Fluoride. Iron. Nitrate.
- 5. Determination of Total Count Test, Most Probable Number (MPN).

<b>S.</b> Determination of Fotal Count Test, Wost Frobable Number (WEN). <b>Modules</b>	Teaching
	Hours
I Analysis of Physical Parameters:	
<ol> <li>Determination of Solids in Water / Sewage – Total Solids, Suspended Solids, Dissolved Solids, Volatile Solids, Fixed Solids, Settleable Solids.</li> </ol>	2 Hours
2. Determination of Turbidity present in water.	2 Hours
3. Determination of Electrical Conductivity of water.	2 Hours
4. Determination of Optimum Alum Dosage.	2 Hours
5. Sieve Analysis of Filter Sand.	2 Hours
II Analysis of Chemical Parameters:	
1. Determination of Chlorides.	2 Hours
2. Determination of Alkalinity, Acidity.	2 Hours
3. Determination of Total Hardness, Calcium Hardness, Magnesium Hardness	2 Hours
4. Determination of Dissolved Oxygen, Biochemical Oxygen Demand (BOD), Chemical Oxygen Demand (COD).	2 Hours
5. Determination of Percentage of Chlorine in Bleaching Powder, Residual Chlorine, Chlorine Demand	2 Hours
III Analysis of Chemical Parameters by Instrumental Methods:	
1. Determination of pH.	2 Hours
2. Determination of Sulphate.	2 Hours
3. Determination of Flouride	2 Hours
4. Determination of Iron.	

IV. Analysis of Biological Parameters:	
1.Determination of Total Count Test, Most Probable Number (MPN).	2 Hours
Question paper pattern:	
Any one of the above experiments is to be conducted in the examination by the	ne student.

## **RESEARCH METHODOLOGY & INTELLECTUAL PROPERTY RIGHTS**

Course Code	21RMI56	Credits	2
Course Type	Theory	CIE Marks	50
Lecture Hours(L:T:P)	1:2:0	SEE Marks	50
Total Hours	28	SEE Hours	3

#### **Course Objectives:**

The objectives of the course is to enable students:

- To Understand the knowledge on basics of research and its types.
- To Learn the concept of defining research problem and Literature Review, Technical Reading.
- To learn the concept of attributions and citation and research design.
- Concepts, classification, need for protection, International regime of IPRs WIPO, TRIPS, Patent Meaning, Types, surrender, revocation, restoration, Infringement, Procedure for obtaining Patent and Patent Agents.
- Meaning, essential requirements, procedure for registration and Infringement of Industrial Designs, Copyright.

Modules	Teaching Hours
Module-1	
Introduction: Meaning of Research, Objectives of Engineering Research, and Motivation in Engineering Research, Types of Engineering Research, Finding and Solving a Worthwhile Problem. Ethics in Engineering Research, Ethics in Engineering Research Practice, Types of Research Misconduct, Ethical Issues Related to Authorship	6
Module-2	
Defining the research problem - Selecting the problem. Necessity of defining the problem Techniques involved in defining the problem- Importance of literature review in defining a problem Literature Review and Technical Reading, New and Existing Knowledge, Analysis and Synthesis of Prior Art Bibliographic Databases, Web of Science, Google and Google Scholar, Effective Search: The Way Forward Introduction to Technical Reading Conceptualizing Research, Critical and Creative Reading, Taking Notes While Reading, Reading Mathematics and Algorithms, Reading a Datasheet.	6
Module-3	
Research design and methods - Research design - Basic principles. Need of research design Features of good design- Important concepts relating to research design - Observation and Facts Attributions and Citations: Giving Credit Wherever Due, Citations: Functions and Attributes, Impact of Title and Keywords on Citations, Knowledge Flow through Citation, Citing Datasets, Styles for Citations, Acknowledgments and Attributions, What Should Be Acknowledged, Acknowledgments in, Books Dissertations, Dedication or Acknowledgments.	6

#### Module-4

5

Basic Concepts of Intellectual Property (IP), Classification of IP, Need for Protection of IP, International regime of IPRs - WIPO, TRIPS. Patents: Meaning of a Patent – Characteristics/ Features. Patentable and Non-Patentable Invention. Procedure for obtaining Patent. Surrender of Patent, revocation &restoration of Patents, Infringement of Patents and related remedies (penalties). Different prescribed forms used in Patent Act. Patent agentsqualifications and disqualifications Case studies on patents - Case study of Neem petent, Curcuma(Turmeric)patent and Basmati rice patent, Apple inc.v Samsung electronics co.Ltd

#### Module-5

Industrial Design: Introduction to Industrial Designs. Essential requirements of Registration. Designs which are not registrable, who is entitled to seek Registration, Procedure for Registration of Designs Copy Right Meaning of Copy Right. Characteristics of Copyright. Who is Author, various rights of owner of Copyright. Procedure for registration. Term of copyright, Infringement of Copyright and Its remedies. Software Copyright.

#### **Question paper pattern:**

- The question paper shall have five Module for 100 marks;
- Each full question carries 20 marks.
- Two questions to be set in each module (total ten questions).
- The candidate will have to answer one full question from each module.

Note: There can be a maximum of 4 subsections in each Question.

#### **Text Books:**

- Research Methodology: Methods and Techniques C.R.Kothari, Gaurav Garg New Age International 4<sup>th</sup> Edition,2018

SUBJECT : REMOTE	SUBJECT : REMOTE SENSING AND GEOGRAPHICAL INFORMATION SYSTEM		
SUBJECT CODE: 21CVAE581	CREDITS :01	Teaching Hours / Week : (L:T:P) (0:2:0)	
CIE : 50 MARKS	SEE: 50 MARKS	SEE: 2 HRS	

#### **COURSE OBJECTIVES:**

• To develop the fundamental concepts of GIS and remote sensing including the electromagnetic

Spectrum, and nature of geospatial data.

• To make the student to understand the various Civil engineering applications of remote sensing.

• To familiarize s the students in the GIS based analytical and problem solving techniques for

• Sustainable planning and management of civil Engineering projects.

## MODULE – I INTRODUCTION:

Introduction to Remote Sensing, Historical Development of Remote Sensing, Remote Sensing Components.

**BASIC PRINCIPLES:** Energy Source & its characteristics, Electromagnetic Energy and Spectrum, Wave Bands,

Interaction of Electromagnetic Energy with Atmosphere and Earth's Surface

#### MODULE-2

#### **REMOTE SENSING PLATFORMS AND SENSORS**

Introduction, Satellite System Parameters, Sensor Parameters, Imaging Sensor System, Earth Resources Satellites,

Metrological Satellites.

#### MODULE -3

#### **MICROWAVE REMOTE SENSING**

Introduction, The Radar Principle. Factors Affecting Microwave Measurements Radar Wave Bands. Side Looking Airborne Radar(SLAR) System. Synthetic Aperture Radar (SAR).

#### **MODULE-4**

#### FUNDAMENTALS OF GIS AND INTRODUCTION OF GPS

Roots of GIS . Overview of Information System. The four Ms. GIS definition and terminology. In brief about GPS

#### MODULE-5

#### INTEGRATION OF REMOTE SENSING AND GIS

Introduction. Remote Sensing and GIS Synergy. Raster Data for GIS. Vector Data for GIS. Need of Integration. General view on application, Applications of RS & GIS in civil engineering field.

## **COURSE OUTCOMES:**

- Understand the importance of remote sensing and GIS application in civil engineering
- Students are familiarize with study and identification of satellite imageries
- Students are able to learn the soft skills by using GIS technologies.

## Course Outcomes: At the end of the course, students will be able to:

CO1: Understand the principles of RS and its components. CO2: Understand the Remote Sensing Platforms and Sensors.

CO3: Understand and familiarize with study and identification of satellite imageries.

CO4: Understand the soft skills by using GIS technologies.

Apply their RS AND GIS knowledge to illustrate and graph a problem and describe the realities that civil engineers face when dealing with issues.

## **REFERENCE BOOKS.**

# **1.** M .ANJI REDDY "REMOTE SENSING AND GEOGRAPHICAL INFORMATON SYSTEM" B S PUBLICATIONS, 3<sup>RD</sup> EDITION

## **Question paper pattern:**

- The Question paper will have 50 objective questions.
- Each question will be for 01 marks
- · Students will have to answer all the questions in an OMR Sheet.
- The Duration of Exam will be 2 hours.

	VI Semester

	IGN OF MASONRY STRUCT		
Subject code	21CV642	Credit: (	)3
Hours/Week 3 hours. (Theory) SEE: 50 M		larks	
Total hours: 42CIE: 50 MarksSEE: 3 h		ours	
Prerequisite: Elements of civil	engineering and Strength of ma	iterial	
Course objectives:			
2. Understand design criteria of	<b>udents</b> to sonry units, strength and factors a f various types of walls subjected ng the codes for strength, servicea	to different load syst	
ethics.			
4. Provide knowledge in analys	is and design of masonry element	S	
	Modules		Teaching Hours
	MODULE-I		mours
Masonry units, materials, typ	es & masonry construction: Brid	k, stone and block	
masonry units –strength, modulus of elasticity and water absorption of masonry materials – classification and properties of mortars, selection of mortars. Defects and errors in masonry construction, cracks in masonry, types, reasons for cracking, methods of avoiding cracks.		10 Hours	
Strength and stability: Streng walls, effect of unit strength,	gth and Stability of concentrical mortar strength, joint thickness, ing, workmanship, Compressive pirical formulae.	rate of absorption,	
	MODULE-II		
reduction and shape modificate eccentric vertical and lateral loat <b>Design Considerations:</b> Effect effective length, effective thick	of walls, permissible compres ation factors, increase in permi ads, permissible tensile stress and tive height of walls and columns, ness, slenderness ratio, eccentricit ems on design considerations for	ssible stresses for shear stresses. openings in walls, y, load dispersion,	7 Hours
	MODULE-III		
Load considerations and design of Masonry subjected to axial loads: Design criteria, design examples of walls under UDL, solid walls, cavity walls, solid wall supported at the ends by cross wall, walls with piers.		9 Hours	
	MODULE-IV	11	0.11
	concentrated axial loads: Solid versions wall, walls with piers, o		8 Hours
Design of walls subjected to a	eccentric loads: Design criteria -		
under eccentric loads – probler walls with piers.	ns on eccentrically loaded solid v	walls, cavity walls,	

wall un Introdu	<b>of Laterally and transversely loaded walls:</b> Design criteria, design of solid nder wind loading, design of shear wall – design of compound walls. ction to reinforced brick masonry, lintels and slabs. In-filled frames: Types s of failures – design criteria of masonry retaining walls.	8 Hours
CO	Course Outcome (CO)	BL
CO1	Explain different types of masonry construction such as brick, stone, reinforced walls in composite action and identify the loads on masonry walls. Summarize various formulae's for finding compressive strength of masonry units.	C2
CO2	Explain permissible stresses and design criteria as per IS: 1905 and SP-20.	C3
CO3	Consider the loads. and design of walls under udl, solid walls, cavity walls	C4
<b>CO4</b>	Design of Masonry walls subjected to axial loads and eccentric loads	C5
CO5	Design of Laterally and transversely loaded walls	C5
i) Two	on paper pattern: questions are to be set from each module. If five questions are to be answered by selecting minimum one question	from each

# EXTENSIVE SURVEY PROJECT \*(MINI PROJECT)

Subject code	21CVP67	Credit: 02
Hours/week	1 hours. (Theory)+ 2 hours Practical	See: 50 marks
Total hours:	CIE: 50 Marks	SEE: 3 hours

# **Prerequisite:**

### **Course objectives:**

To be conducted between 5th& 6th Semester for a period of 2 weeks, Viva voce conducted along with 6th semester exams)

An extensive survey training involving investigation and design of the following projects is to be conducted for 2 weeks (14 days). The student shall submit a project report consisting of designs and drawings. Preferably the Total Station must be used for the survey work of the projects

General instructions, Reconnaissance of the sites and fly levelling to establish bench marks. **1.new tank projects:** The work shall consist of

Alignment of center line of the proposed bund, Longitudinal and cross sections of the center line. Capacity surveys.

### 2. Details at Waste weir and sluice points. Canal alignment:

**3. Restoration of an existing tank:** The work shall consist of: Alignment of center line of the existing bund, Longitudinal and cross- sections. along the center line. Capacity surveys, details at sluice and waste weir.

## 4. Water supply and sanitary project:

Examination of sources of water supply, Calculation of quantity required based on existing and projected population. Preparation of village map by any suitable method of surveying (like plane tabling), location of sites for ground level and overhead tanks, underground drainage system surveys for laying the sewers

**5. Highway project:** Preliminary and detailed investigations to align a new road between two terminal stations. The investigations shall consist of topographic surveying of strip of land for considering alternate routes and for final alignment. Report should justify the selected alignment with details of all geometric designs for traffic and design speed assumed. Drawing shall include key plan initial alignment, final alignment, longitudinal section along final alignment, typical cross sections of road

**Course Outcomes:** On completion of this course, students are able to:

CO		BL
CO1	Demonstrate the concepts of survey, water resource engineering,	C2
	environmentalengineeringandtransportationengineeringtheorycoursethroughseriesof	
	experiments	
CO2	Share the responsibilities in small teams of 4-5 members for conducting the	C2
	experiments.	
CO3	Perform the experiments and determination of General instructions,	C4

	Reconnaissance new tank projects Alignment of center line of the proposed bund,	
	Longitudinal and cross sections of the centerline. restoration of an existing tank,	
	water supply and sanitary project, Examination of sources of water supply, highway	
	project Preliminary and	
	detailed investigations to align a new road between two terminal stations.	
CO4	Analyze the data and design the projects such highway, water supply and	C3
	sanitation, overhead tank and restoration of existing tank project	
CO5	Prepare a well-organized drawings and report containing detail design.	C3
