

### III Semester

<div>PDA COLLEGE OF ENGINEERING,KALABURAGI</div> <div>B E. Third Semester</div> <div>Engineering Mathematics for Civil Engineering Stream-III</div> <div>[As per Choice Based Credit System (CBCS) scheme]</div> <div>(From the academic year 2022-23)</div>				
	Course Code	22MATC31	CIE Marks	50
	Credits	03	SEE Marks	50
	Contact Hours/Week (L-T-P)	3-0-0	Total Marks	100
	Contact Hours	42	Exam Hours	03
<div>Course Learning Objectives: To enable the students to obtain the knowledge of Engineering Mathematics in the following topics</div> <div><div>1. Fourier Series and its application in engineering fields</div><div>2. Probability distribution of discrete and continuous random variables</div><div>3. Analyze the sample data using Large sample test, t-distribution and chi- distribution</div></div>				
<div>Module-I9hours</div> <div>Statistical methods:</div> <div>Curve fitting by the method of least squares: Straight line, second degree parabola and the curves of the form <math>y = ab^x</math>, <math>y = ax^b</math> and <math>y = ae^{bx}</math>.</div> <div>Correlation and lines of regression, angle between two regression lines and rank correlation</div> <div>RBT Levels: L1, L2 &amp; L3</div>				
<div>Module-II8 hours</div> <div>Probability distributions:</div> <div>Random variable (Discrete and continuous) probability density function, cumulative density function. Binomial distribution, Poisson distributions, Normal distribution and problems.</div> <div>RBT Levels: L1, L2 &amp; L3</div>				
<div>Module-III9 hours</div> <div>Joint probability distributions:</div> <div>Concept of joint probability distribution, discrete and continuous random variables independent random variables .problems on expectation and variance</div> <div>RBT Levels: L1, L2 &amp; L3</div>				

<b>Module –IV</b>	<b>8 hours</b>
<p><b>Sampling theory -I</b></p> <p>Sampling, sampling distribution, standard error, null and alternative hypothesis, Type-I and Type-II errors, Confidence limits. Test of significance for Large sample: Test for single proportion, difference of proportions, single mean, difference of means, and difference of standard deviations</p> <p><b>RBT Levels: L1, L2 &amp; L3</b></p>	
<b>Module –V</b>	<b>8 hours</b>
<p><b>Sampling theory -II</b></p> <p>Test of significance Small samples student's t-distribution: Test for single mean, difference of means, test for ratio of variances - Chi-square test for goodness of fit and independence of attributes and problems</p> <p><b>RBT Levels: L1, L2 &amp; L3</b></p>	
<p><b>Text books:</b></p> <p>1 Higher Engineering Mathematics by B.S.Grewal, Khanna publishers; 40<sup>th</sup> Edition.2007  2 Engineering Mathematics by N. P. Bali and Manish Goyal. Laxmi publications, latest edition</p> <p><b>Reference books:</b></p> <p>1.Advanced Engineering Mathematics by E. Kreyszig, John Willey &amp; sons 8<sup>th</sup> Edn.  2.A short course in differential equations – Rainville E.D.9<sup>th</sup> Edition.  3.Advanced Engineering Mathematics by R.K.Jain &amp; S.R.K Iyengar; Narosa publishing House.  4.Introductory methods of numerical analysis by S.S.Sastry  5. Statistical Methods Authored By Gupta S.P. Publisher: Sultan Chand &amp; Sons. Publishing Year: 2021  6.Fundamentals of Mathematical Statistics Authored By Gupta S.C.&amp; Kapoor V.K. Publisher:Sultan Chand &amp; Sons.Publishing Year: 2020</p>	

**Course Outcomes:** On completion of this course, students are able to:

CO1: Apply the method of least square to estimate the parameters in regression model

CO2: Solve problems using theoretical probability distributions

CO3: Apply the concepts of joint probability, to find covariance, correlation, independent variables

CO4: Analyze the sample data using Large sample tests

CO5: Analyze the sample data using t-distribution and chi- distribution
