

### III Semester

<p align="center"><b>PDA COLLEGE OF ENGINEERING, KALABURAGI</b>  <b>B E. Third Semester</b></p> <p align="center"><b>Engineering Mathematics for Mechanical Engineering Stream-III</b>  [As per Choice Based Credit System (CBCS) scheme]  (From the academic year 2022-23)</p>				
	Course Code	22MATM31	CIE Marks	50
	Credits	03	SEE Marks	50
	Contact Hours/Week (L-T-P)	3-0-0	Total Marks	100
	Contact Hours	42	Exam Hours	03
<p><b>Course Learning Objectives:</b> To enable the students to obtain the knowledge of Engineering Mathematics in the following topics</p> <ol style="list-style-type: none"> <li>1. Fourier Series and its application in engineering fields</li> <li>2. Probability distribution of discrete and continuous random variables</li> <li>3. Analyze the sample data using Large sample test, t-distribution and chi- distribution</li> </ol>				
<p align="center"><b>Module-I</b> <span style="float: right;"><b>9hours</b></span></p> <p><b>Fourier series:</b></p> <p>Periodic functions, Fourier series with periods <math>(0, 2\pi)</math>, <math>(-\pi, \pi)</math>, <math>(0, 2l)</math> and <math>(-l, l)</math>. Half range Fourier series, Practical harmonic analysis and problems.</p> <p><b>RBT Levels: L1, L2 &amp; L3</b></p>				
<p align="center"><b>Module-II</b> <span style="float: right;"><b>8 hours</b></span></p> <p><b>Probability distributions:</b></p> <p>Random variable (Discrete and continuous) probability density function, cumulative density function. Binomial distribution, Poisson distributions, Normal distribution and problems.</p> <p><b>RBT Levels: L1, L2 &amp; L3</b></p>				
<p align="center"><b>Module-III</b> <span style="float: right;"><b>9 hours</b></span></p> <p><b>Joint probability distributions:</b></p> <p>Concept of joint probability distribution, discrete and continuous random variables independent random variables .problems on expectation and variance</p> <p><b>RBT Levels: L1, L2 &amp; L3</b></p>				

<p><b>Sampling theory -I</b></p> <p>Sampling, sampling distribution, standard error, null and alternative hypothesis, Type-I and Type-II errors, Confidence limits. Test of significance for Large sample: Test for single proportion, difference of proportions, single mean, difference of means, and difference of standard deviations</p> <p><b>RBT Levels: L1, L2 &amp; L3</b></p>	<p><b>Module –IV</b></p> <p><b>8 hours</b></p>
<p><b>Sampling theory -II</b></p> <p>Test of significance Small samples student's t-distribution: Test for single mean, difference of means, test for ratio of variances - Chi-square test for goodness of fit and independence of attributes and problems</p> <p><b>RBT Levels: L1, L2 &amp; L3</b></p>	<p><b>Module –V</b></p> <p><b>8 hours</b></p>
<p><b>Text books:</b></p> <p>1 Higher Engineering Mathematics by B.S.Grewal, Khanna publishers; 40<sup>th</sup> Edition.2007  2 Engineering Mathematics by N. P. Bali and Manish Goyal. Laxmi publications, latest edition</p> <p><b>Reference books:</b></p> <p>1.Advanced Engineering Mathematics by E. Kreyszig, John Willey &amp; sons 8<sup>th</sup> Edn.  2.A short course in differential equations – Rainville E.D.9<sup>th</sup> Edition.  3.Advanced Engineering Mathematics by R.K.Jain &amp; S.R.K Iyengar; Narosa publishing House.  4.Introductory methods of numerical analysis by S.S.Sastry  5. Statistical Methods Authored By Gupta S.P. Publisher: Sultan Chand &amp; Sons. Publishing Year: 2021  6.Fundamentals of Mathematical Statistics Authored By Gupta S.C.&amp; Kapoor V.K. Publisher:Sultan Chand &amp; Sons.Publishing Year: 2020</p>	

**Course Outcomes:** On completion of this course, students are able to:

CO1: Construction of Fourier series for periodic signals and Fourier series to analyze vibrations

CO2: Solve problems using theoretical probability distributions

CO3: Apply the concepts of joint probability, to find covariance, correlation, independent variables

CO4: Analyze the sample data using Large sample tests

CO5: Analyze the sample data using t-distribution and chi- distribution
